Automated Taxon Identification in Systematics Norman MacLeod,2007-07-23 The automated identification of biological objects or groups has been a dream among taxonomists and systematists for centuries However progress in designing and implementing practical systems for fully automated taxon identification has been frustratingly slow Regardless the dream has never died Recent developments in computer architectures an Manual for Pharmacy Technicians Bonnie S. Bachenheimer,2019-08-15 The Trusted Training Resource for Pharmacy Technicians at All Levels The role of pharmacy technicians is rapidly expanding and demand for well trained technicians has never been higher Technicians are assuming more responsibilities and are taking on greater leadership roles Quality training material is increasingly important for new technicians entering the field and current technicians looking to advance Look no further than the new 5th edition of the best selling Manual for Pharmacy Technicians to master the practical skills and gain the foundational knowledge all technicians need to be successful

Automatic Design of Decision-Tree Induction Algorithms Rodrigo C. Barros,André C.P.L.F de Carvalho,Alex A. Freitas,2015-02-04 Presents a detailed study of the major design components that constitute a top down decision tree induction algorithm including aspects such as split criteria stopping criteria pruning and the approaches for dealing with missing values Whereas the strategy still employed nowadays is to use a generic decision tree induction algorithm regardless of the data the authors argue on the benefits that a bias fitting strategy could bring to decision tree induction in which the ultimate goal is the automatic generation of a decision tree induction algorithm tailored to the application domain of interest For such they discuss how one can effectively discover the most suitable set of components of decision tree induction algorithms to deal with a wide variety of applications through the paradigm of evolutionary computation following the emergence of a novel field called hyper heuristics Automatic Design of Decision Tree Induction Algorithms would be highly useful for machine learning and evolutionary computation students and researchers alike
