- The number of desired DMS solutions (solution groups) per test
- Each light group can have DMS channels (DMS)
- The DMS Start Channel for the fixture. The desired light groups (wavelengths) sequentially beginning with the Start Light Channel for one multiple ColorMatch fixture is a sequential application. It is necessary to calculate the first channel used for the previous fixture to determine the DMS Start Channel for the next fixture.

The first step in addressing the future is to set the mission of groups. Using the **VISION OF CAPSITY** collection feature, post it on – to avoid the number of answers for the future. Refer to the same index.
