Mechanics of Composite Materials with MATLAB George Z Voyiadjis, Peter I. Kattan, 2005-10-28 This is a book for people who love mechanics of composite materials and MATLAB We will use the popular computer package MATLAB as a matrix calculator for doing the numerical calculations needed in mechanics of composite materials In particular the steps of the mechanical calculations will be emphasized in this book The reader will not find ready made MATLAB programs for use as black boxes Instead step by step solutions of composite material mechanics problems are examined in detail using MATLAB All the problems in the book assume linear elastic behavior in structural mechanics The emphasis is not on mass computations or programming but rather on learning the composite material mechanics computations and understanding of the underlying concepts The basic aspects of the mechanics of fiber reinforced composite materials are covered in this book This includes lamina analysis in both the local and global coordinate systems laminate analysis and failure theories of a lamina
