**Equity-Based Career Development and Postsecondary Transitions** Erik M. Hines, Laura Owen, 2022-03-01 Former First Lady Michelle Obama believes that every individual should have some type of postsecondary education or training beyond high school to achieve economic and personal success. Reach Higher Initiative Better Make Room 2019 Educational attainment e.g. a high school diploma college degree or postsecondary training provides career opportunities for advancement into leadership positions and benefits such as health insurance and retirement. Heckman 2000. Additionally, an individual with a college degree can make over one million dollars more over a lifetime in salary than someone with a high school diploma. Carnevale Cheah Hanson 2015. Acquiring a college degree can lead to employment opportunities and is considered an asset in the U.S. economy. Washington 2010. However, certain populations encounter barriers to attaining an education, particularly a postsecondary education, leading to a disparity in receiving the aforementioned benefits. Some of these populations include African American students, LGBTQ students, and students with disabilities. There is a dearth of information and research on providing guidance on implementation, research, and best practices in equity-based career development, college readiness, and successful postsecondary transitions for minoritized, at-risk, or vulnerable populations. The editors of this volume invited authors with research and practice expertise around various student populations in preparing them for college and career readiness as well as postsecondary transitions. This book is the first of its kind to discuss career development and postsecondary transitions from an access and equity perspective. Further, this text serves as a call to action to ensure the United States' most vulnerable populations have an opportunity to successfully transition into multiple postsecondary options.

Eliason, John Patrick, 2008-10-01 Career Development in the Schools describes a dynamic process that continues to evolve in its rationale and practice In many schools and in a variety of scholarly writings the status of career development is controversial Some observers assert that career development should be seen as a by product of all of the knowledge and activities that are incorporated in the educational experience In this view career development tends to be seen as a random process that happens in a natural almost magical way without specific direction or structured form However most career theorists would argue that the career development of students should be a major mission of the school a process too important to be only a by product of scattered learning and activities that are inherently uneven from student to student The prevailing contemporary perspective contends that career development in the schools should be planned have its own content derived from research and theory be systematically executed and use methods that are relevant to the developmental levels of students throughout elementary middle and senior high schools To further such ends several national models of content and practice have been formulated by the American School Counselor Association the National Career Development Revised Guidance Project and by other organizations to identify the components competencies and outcomes that students of different ages and aspirations need to acquire as they grow in maturity Several of these models are discussed at length in the various chapters of this book
