

Elements of Visual Image Interpretation

- Visual interpretation involves visual analysis of aerial photographs and satellite images. When the interpretation is carried out with the help of computer software, it is known as digital interpretation.
- Visual image interpretation is a process of identifying features seen on the images by an analyst/interpreter and communication of information obtained from these images to others for evaluating their significance. This process, however, is not restricted to making decisions concerning what objects appear in images but it also includes determination of their relative locations and extents.

accordance with the main rule underlying the OECD Model thus ensuring that no income falls outside the scope of the treaty. This study provides a comprehensive analysis of Article 21 of the OECD Model in extensive detail and with reference to case law from a number of jurisdictions and to statements of various authorities and official documents the author shows how Article 21 operates in relation to the other distributive rules of the OECD Model and bilateral tax treaties based thereon. The analysis considers such items of income as the following in relation to Article 21: income from immovable property, business profits, profits from shipping, inland waterways transport and air transport, dividends, interest and royalties, capital gains and income from employment. In addition, the author examines the significance of the OECD Commentaries for the interpretation of tax treaties, the other income article in other model conventions and notable deviations from Article 21 among bilateral tax treaties. An appendix offers well grounded recommendations on how to potentially amend the wording of Article 21 and the related commentary and how the application of the article can be improved. Although underexposed in the tax law literature heretofore, the other income article raises important international taxation issues that remain problematic or unresolved. Tax lawyers, government officials and other interested professionals will find here a penetrating analysis that goes a long way towards clarifying the characterisation of income that resists the standard categories defined in tax treaties.
