Fundamentals of Modern Bioprocessing Sarfaraz K. Niazi, Justin L. Brown, 2017-07-27

Biological drug and vaccine manufacturing has quickly become one of the highest value fields of bioprocess engineering and many bioprocess engineers are now finding job opportunities that have traditionally gone to chemical engineers. Fundamentals of Modern Bioprocessing addresses this growing demand. Written by experts well established in the field, this book connects the principles and applications of bioprocessing engineering to healthcare product manufacturing and expands on areas of opportunity for qualified bioprocess engineers and students. The book is divided into two sections: the first half centers on the engineering fundamentals of bioprocessing while the second half serves as a handbook offering advice and practical applications. Focused on the fundamental principles at the core of this discipline, this work outlines every facet of design, component selection and regulatory concerns. It discusses the purpose of bioprocessing to produce products suitable for human use, describes the manufacturing technologies related to bioprocessing and explores the rapid expansion of bioprocess engineering applications relevant to health care product manufacturing. It also considers the future of bioprocessing, the use of disposable components which is the fastest growing area in the field of bioprocessing to replace traditional stainless steel. In addition, this text discusses the many types of genetically modified organisms, outlines laboratory techniques, includes the most recent developments, serves as a reference and contains an extensive bibliography. Emphasizes biological manufacturing using recombinant processing which begins with creating a genetically modified

organism using recombinant techniques Fundamentals of Modern Bioprocessing outlines both the principles and applications of bioprocessing engineering related to healthcare product manufacturing It lays out the basic concepts definitions methods and applications of bioprocessing A single volume comprehensive reference developed to meet the needs of students with a bioprocessing background it can also be used as a source for professionals in the field **Chemistry I | AICTE Prescribed Textbook - English** Manisha Agrawal,2021-11-01 Chemistry I is a compulsory paper for the first year Undergraduate course in Engineering Technology Syllabus of this book is strictly aligned as per model curriculum of AICTE and academic content is amalgamated with the concept of outcome based education Book covers seven topics Atomic and molecular structure Spectroscopic Technique and applications Inter molecular Forces and Potential Energy Surfaces Use of Free Energy in Chemical Equilibrium Periodic Properties Stereo chemistry Organic Reactions and Synthesis of Drug Molecules Each topic is written in easy and lucid manner Every chapter contains a set of exercise at the end of each unit to test student's comprehension Salient Features Content of the book aligned with the mapping of Course Outcomes Programs Outcomes and Unit Outcomes Book Provides lots of recent information interesting facts QR Code for E resources QR Code for use of ICT Projects group discussion etc Students and teacher centric subject materials included in book with balanced and chronological manner Figures tables chemical equations and comparative charts are inserted to improve clarity of the topics Short questions objective questions and long answer exercises are given for practice of students after every chapter Solved and unsolved problems including numerical examples are solved with systematic steps **Make and Test Projects in Engineering Design** Andrew E.
