Environmental Science Scope And Sequence:

Educating Science Teachers for Sustainability Susan K. Stratton, Rita Hagevik, Allan Feldman, Mark Bloom, 2015-06-18 This volume contains a unique compilation of research and reflections representing multiple vantage points stemming from different parts of the world that can help science educators and teacher educators in finding ways to meaningfully and purposefully embed sustainability into teaching and learning. It is a rich resource for exploring and contextualizing sustainability oriented science education. At this time we find ourselves in a situation in which the earth's ecological system is under significant strain as a result of human activity. In the developed world people are asking: How can we maintain our current standard of living while those in the developing world are asking: How can we increase the quality of our lives all while trying to do what is necessary to mitigate the environmental problems? This volume responds to these questions with a focus on educating for sustainability including historical and philosophical analyses and pedagogical and practical applications in the context of science teacher preparation. Included are many examples of ways to educate science teachers for sustainability from authors across the globe. This text argues that issues of sustainability are increasingly important to our natural world, built world, national and international economics, and of course the political world. The ideas presented in the book provide examples for original, effective, and necessary changes for envisioning educating science teachers for sustainability that will inform policy makers.

Equitable School Scheduling Cheryl Hibbeln, Lori Rhodes, 2024-11-05 To understand a school's values and priorities, look at its schedule. When schedules do not meet the instructional needs of students, the result is a pipeline from PreK through grade 12 that leaks students, an outcome disproportionately experienced by students of color and other marginalized student groups. This practical and thoughtful guide demonstrates how school and district scheduling teams can become Architects of Equity: highly effective teams who design schedules that reflect their commitment to student achievement and social emotional wellbeing. Including strategies to shift collective mindsets around scheduling, organize and support teaching teams, and ensure fiscal responsibility in scheduling, *Equitable School Scheduling* is a vital resource for secondary school leaders committed to dismantling systemic inequities inherent in school structures. Readers will learn how to self-assess site and/or district data through a deep examination of the course of study, site schedule's transcripts, and graduation cohort outcomes. Design and implement an Equitable Core: a guaranteed set of courses that all students experience as a part of a meaningful graduation. Prioritize underestimated and historically underserved students in the planning of the schedule. *Equitable School Scheduling* helps school and district administrators use scheduling as a tool to transform the leaky pipeline to graduation into a meaningful path to post-secondary success for all students.
