Before using the projector, make sure you read the safety instructions in the online User's Guide.

## Choose a location

Keep the projector level and place it at a height so its lens is even with the top or the bottom of the screen and is centered horizontally. If this isn't possible, use the keystone correction buttons on the projector to reposition the image (see "Adjust the image").

In order to view 3D images correctly, RF 3D glasses must be worn within 32 feet (10 m) of the projector. Use the image below to determine the viewing distance for 3D projection (the shading represents the 3D viewing area):

See the online User's Guide for more information on where to place your projector.

## Connect the projector

Connect up to 5 video devices and use the **Source** buttons on the projector or remote control to switch between them.

For additional connection types, see the online User's Guide.

## Turn on your equipment

- 1 Turn on your video source.
- 2 Plug in the projector.

- 3 Turn on the power switch on the back of the projector. The power button on the projector turns blue.
- 4 Press the power button on the projector or the On button on the remote control. The power light flashes blue, and then stays on.

**Note:** To shut down the projector, press the power button on the projector twice or the Standby button on the remote control, then unplug it. You don't have to wait for the projector to cool down.

- 5 The default language of the menu system is **English**. To select another language, press the **Menu** button on the remote control. Select **Extended** and press **Enter**. Select **Language** and press **Enter**. Select your language and press **Enter**. Press the **Menu** button to exit the menu system.

## Adjust the image

- 1 If you don't see an image, press the **Source** buttons on the remote control or the button on the projector to select the image source.

**Note:** If you still see a blank screen or have other display problems, see "Troubleshooting."

- 2 Turn the horizontal and vertical lens shift dials to adjust the image position and center it between the top and bottom of the screen.
