Financial Everfi Module 4:

Financial Education in U.S. State Colleges and Universities Donna E. Danns, 2015-11-28 This book addresses the uncertain state of financial literacy among today's college students and examines steps colleges and universities are taking to address this widespread concern. This work introduces a four-fold typology of organizational models for college-based financial education programs and uses these as optics for grouping and presenting case studies. The case studies presented provide a holistic representation of how universities develop, sustain, and grow financial education programs. Details on the nature of programs, goals, administrative support, resources, partnerships, scale of operations, program content, and delivery, advertising, evaluation, program spinoffs, and much more are captured in this work. In addition to detailed case studies, this book presents general findings on the availability of and delivery modes for college-based financial education. This work has significant utility for universities and colleges seeking to implement new financial education programs, changing existing programs, improving program relevancy, or expanding program delivery on campus. It is an important contribution to the experiential understanding on how college students as consumers can acquire financial education as part of their broader college curricula and be able to better manage their financial lives. Included in the coverage: The financial literacy imperative, Program delivery and organizational models in state colleges and universities, The academic model, The full-fledged money management center, The aspirational seed program, The branch interspersed model. As financial literacy is increasingly recognized as a core life skill, it becomes more crucial as a component of higher education. *Personal Financial Education in State Colleges and Universities in the U.S.* is salient reading for college and university administrators, researchers, social workers, and mental health professionals working with college students, policy analysts, and faculty from any discipline interested in promoting the financial literacy of their students.

Critical Empathy as Teacher Education Reform Thomas A. Lucey, Kathleen S. Cooter, 2024-08-01 This book considers teacher training in social studies and finds it lacking a sense of genuine critical empathy, a sense of shared humanity. Current teacher education generally defines critical thinking as processes which examine topics in greater complexity but does not prepare candidates to study, confront, and challenge existing social structures. Often in response to state mandates, teacher education programs rate and interpret candidate quality based on their conformance with standards and defined outcomes. There is a lack of tolerance for alternative views that may substantially challenge the often oppressive hierarchical system of authority in our world. This volume, which includes contributions from social studies educators in the U.S., Canada, and Australia, offers the thinking and practice of teacher education scholars who embrace the idea and practices of empathy in the social studies classroom. Defined as the ability to understand and share the feelings of another, direct emphasis on empathy represents a vehicle for developing a sense of mutual understanding and questioning of economic and social systems. Developing teacher candidates who comprehend and experience the feelings of diverse education stakeholders provides opportunities for harmonious teaching.
