

Chapter 2

Firms and the Financial Market

■ Chapter Overview

This chapter provides an overview of U.S. financial markets. Financial markets consist of the institutions that facilitate the transfer of money from investors to companies and individuals. The three principal players in the financial markets are borrowers, savers (i.e., investors), and financial institutions (i.e., intermediaries). There is a wide variety of financial institutions that make up our financial markets, including commercial banks, financial services corporations, insurance companies, investment banks, investment companies, mutual funds and exchange traded funds, hedge funds, and private equity firms.

The purpose of each of these institutions is to bring borrowers and investors together. Borrowers and investors are linked together through the buying and selling of a variety of securities that are traded on financial markets. While there are innumerable types of financial instruments traded on financial markets, most are some form of debt or equity security.

■ Chapter Outline

2.1 The Basic Structure of U.S. Financial Markets

- A. A financial market is any place where money and credit are exchanged.
- B. The three principal sets of players in financial markets are borrowers, savers (investors), and financial institutions (intermediaries).

2.2 The Financial Marketplace: Financial Institutions

- A. The financial institutions that make up the financial marketplace facilitate the movement of money from savers to borrowers.
 - 1. The money market refers to transactions in short-term debt instruments.
 - 2. Capital markets are markets for long-term financial instruments.
- B. A major category of financial institutions includes depository institutions.
 - 1. Depository institutions include commercial banks, savings and loan associations, and credit unions.
 - 2. Depository institutions collect savings from individuals and businesses and then lend these pooled savings to other individuals and businesses.
- C. Non-bank (or non-depository) financial intermediaries provide financial services to businesses. There are a variety of non-bank financial intermediaries.
 - 1. Financial services corporations are in the lending or financing business, but they are not commercial banks.
 - 2. Insurance companies are in the business of selling insurance to individuals and businesses to protect their investments.

Financial Management and Accounting in the Public Sector Gary Bandy, 2023-03-14

The importance of public financial management for the health and wellbeing of citizens became dramatically apparent as governments sought to respond to the coronavirus pandemic in 2020. Now governments and other public sector organizations face the challenge of recovering from the pandemic whilst also seeking to achieve Sustainable Development Goals with squeezed budgets and ever increasing demands for public services. Public sector managers are confronted daily with targets and demands that are often set in confusing accounting and financial language. In *Financial Management and Accounting in the Public Sector* Gary Bandy employs a clear and concise narrative to introduce the core concepts of public financial management to help those managers to deliver programmes, projects and services that are value for money. As the author puts it, managing public money is an art, not a science. This third edition has been revised and updated throughout, offering a structure that is more clearly linked to the stages of the public financial management cycle, greater coverage of transparency and accountability issues, a broader view of public procurement to include goods, works and services, and effective contract management, and an increased focus on public spending in the context of a post COVID environment. With a glossary of terms to help managers understand and be understood by accountants, as well as learning objectives, discussion questions and exercises, this practical textbook will help students of public management and administration to understand the financial and accounting aspects of managing public services.

Foundations of Airline Finance Bijan Vasigh, Zane C. Rowe, 2019-07-02

There are few industries that have had a more profound impact on business and society over the last century than aviation. This book is an accessible, up to date introduction to the current state of the aviation industry which provides readers with the tools necessary to understand the volatile and often complicated nature of airline finance. Understanding finance is critical in any industry; however, the financial track record of the airline industry places even more importance on effective financial management. *Foundations of Airline Finance* provides an introduction to the basics of finance, including time value of money, the valuation of assets, and revenue management, and the particular intricacies of airline finance, where there can be wild fluctuations in both revenues and costs. The third edition of this text has been extensively updated to reflect the many changes in the air transport industry that have taken place since the publication of the second edition, and features an expanded chapter on aircraft leasing and many new international case examples. This thorough introduction to aviation finance is valuable reading as a general introductory financial text, or as reading in specialized airline finance classes.
