The Place of Information Technology in Management and Business Education Ben-Zion Barta, Peter Juliff, 2013-06-05 The power of modern information systems and information technology IS/IT offers new opportunities to rethink at the broadest levels existing business strategies approaches and practices Over the past decade IT has opened up new business opportunities led to the development of new strategic IS and challenged all managers and users of IS/IT to devise new ways to make better use of information Yet this era which began with much confidence and optimism is now suffering under a legacy of systems that are increasingly failing to meet business needs and lasting fixes are proving costly and difficult to implement General management is experiencing a crisis of confidence in their IS functions and in the chief information systems officers who lead them Earl and Feeney 1994 11 The concern for chief executive officers is that they are confronting a situation that is seemingly out of control They are asking What is the best way to rein in these problems and effectively assess IS performance Further how can we be certain that IS is adequately adding value to the organisational bottom line On the other hand IS executives and professionals who are responsible for creating managing and maintaining the organisation's systems are worried about the preparedness of general managers to cope with the growth in new technologies and systems They see IT having a polarising effect on general managers it either bedazzles or frightens them Davenport 1994 119

Evil Media Matthew Fuller, Andrew Goffey, 2012-08-17 A philosophical manual of media power for the network age Evil Media develops a philosophy of media power that extends the concept of media beyond its tried and trusted use in the games of meaning symbolism and truth It addresses the gray zones in which media exist as corporate work systems algorithms and data structures twenty first century self improvement manuals and pharmaceutical techniques Evil Media invites the reader to explore and understand the abstract infrastructure of the present day From search engines to flirting strategies from the value of institutional stupidity to the malicious minutiae of databases this book shows how the devil is in the details The title takes the imperative Don t be evil and asks what would be done any differently

in contemporary computational and networked media were that maxim reversed Media here are about much more and much less than symbols stories information or communication media do things They incite and provoke twist and bend leak and manage In a series of provocative stratagems designed to be used Evil Media sets its reader an ethical challenge either remain a transparent intermediary in the networks and chains of communicative power or become oneself an active transformative medium

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
