Roy van Driesche, Daniel Simberloff, Bernd Blossey, Charlotte Causton, Mark Hoddle, Christian O. Marks, Kevin M. Heinz, David L. Wagner, Keith D. Warner, 2016-08-01 Invasive species have a critical and growing effect upon natural areas They can modify degrade or destroy wildland ecosystem structure and function and reduce native biodiversity Landscape level solutions are needed to address these problems Conservation biologists seek to limit such damage and restore ecosystems using a variety of approaches One such approach is biological control the deliberate importation and establishment of specialized natural enemies which can address invasive species problems and which should be considered as a possible component of restoration Biological control can be an effective tool against many invasive insects and plants but it has rarely been successfully employed against other groups Safety is of paramount concern and requires that the natural enemies used be specialized and that targeted pests be drivers of ecological degradation While modern approaches allow species to be selected with a high level of security some risks do remain However as in all species introductions these should be viewed in the context of the risk of failing to reduce the impact of the invasive species This unique book identifies the balance among these factors to show how biological control can be integrated into ecosystem restoration as practiced by conservation biologists Jointly developed by conservation biologists and biological control scientists it contains chapters on matching tools to management goals tools in action measuring and evaluating ecological outcomes of biological control introductions managing conflict over biological control and includes case studies as well as an ethical framework for integrating biological control and conservation practice Integrating Biological Control into Conservation Practice is suitable for graduate courses in invasive species management and biological control as well as for research scientists in government and non profit conservation organizations **Handbook of Environment & Waste Management** Yung-Tse Hung, 2014

Environmental Assessment in Practice Owen Harrop, Ashley Nixon, 2005-08-05 This text explains what constitutes good practice in applying environmental assessment as an environmental management tool. A wide range of case studies and other student text features are employed to demonstrate how the different methods, techniques, and disciplines of environmental assessment can be used. The authors address the key concepts for environmental assessment procedures, methods for using EA, techniques for impact prediction and evaluation, environmental risk assessment, EA consultation and participation, project management, environmental statement review and post-project analysis, and strategic environmental assessment. Worldwide case studies include gas pipelines, hydroelectric power plants, gold mining, river crossings, waste-to-energy plants, and gravel extraction in England, Scotland, Ireland, Canada, the USA, Venezuela, the Netherlands, Iceland, Zambia, Zimbabwe, South Africa, and Ghana. The Scandal of Standardized Tests Joseph A. Soares, 2020-02-14 This update to SAT Wars provides new evidence in the case against standardized college entry tests, including the experiences of test-optional colleges. *The Scandal of Standardized Tests* sheds significant light on key problems such as: Are the tests stronger proxies for race and family income today than they were 20 years ago? Does going test-optional promote racial and economic diversity? Are there any differences in academic records between students admitted without test scores and those with them? How does testing figure into race-sensitive admissions? Legal controversies: Why is the College Board's environmental dashboard inadequate as a way to create a fair playing field? How are the odds of attending and graduating from college stacked against low-income youths and racial minorities? What does the FBI Varsity Blues sting tell us about college admissions in America? Book Features: Provides 25 years of data on California showing how the correlation of test scores with race has grown over

time while their predictive powers have declined Shows how the disparate results of SAT ACT scores by race provide grounds for a constitutional challenge to the use of those tests Provides an overview of our current national situation regarding college applications attendance and graduation rates according to family income and college major Offers a devastating critique of the College Board's adversity index Includes a national balance sheet on the experiences of test optional colleges
