**Improving Working Memory in Learning and Intellectual Disabilities** Silvia Lanfranchi, Barbara Carretti, 2016-08-05 The last forty years of research have demonstrated that working memory WM is a key concept for understanding higher order cognition To give an example WM is involved in reading comprehension problem solving and reasoning but also in a number of everyday life activities It has a clear role in the case of atypical development too For instance numerous studies have shown an impairment in WM in individuals with learning disabilities LD or intellectual disabilities ID and several researchers have hypothesized that this can be linked to their difficulties in learning cognition and everyday life The latest challenge in the field concerns the trainability of WM If it is a construct central to our understanding of cognition in typical and atypical development then specific intervention to sustain WM performance might also promote changes in cognitive processes associated with WM The idea that WM can be modified is debated however partly because of the theoretical implications of this view and partly due to the generally contradictory results obtained so far In fact most studies converge in demonstrating specific effects of WM training i e improvements in the trained tasks but few transfer effects to allied cognitive processes are generally reported It is worth noting that any maintenance effects when investigated are even more meagre In addition a number of methodological concerns have been raised in relation to the use of 1 single tasks to assess the effects of a training program 2 WM tasks differing from those used in the training to assess the effects of WM training and 3 passive control groups These and other crucial issues have so far prevented any conclusions from being drawn on the efficacy of WM training Bearing in mind that the opportunity to train WM could have a huge impact in the educational and clinical settings it seems fundamentally

important to shed more light on the limits and potential of this line of research The aim of the research discussed here is to generate new evidence on the feasibility of training WM in individuals with LD and ID There are several questions that could be raised in this field For a start can WM be trained in this population Are there some aspects of WM that can be trained more easily than others Can a WM training reduce the impact of LD and ID on learning outcomes and on everyday living What kind of training program is best suited to the promotion of such changes

descriptions of instructional materials specifically created for and tested in high school science classrooms Features include A handy table that takes you straight to the chapters most relevant to your needs In depth commentaries and illustrative examples that demystify engineering curricula at the high school level A vivid picture of what each curriculum looks like in the classroom the learning goals it accomplishes and how it helps address the NGSS More information on the integration of engineering and technology into 21st century science classrooms and why it will make a difference One of the most well respected science educators in the country Cary Sneider was an NGSS Writing Team Leader and is an associate research professor at Portland State University International Perspectives on Gender and Mathematics Education Olof Steinthorsdottir, Helen J. Forgasz, Joanne Rossi Becker, Kyeonghwa Lee, 2010-06-01 Why a book on gender issues in mathematics in the 21st century Several factors have influenced the undertaking of this project by the editors First an international volume focusing on gender and mathematics has not appeared since publication of papers emerging from the 1996 International Congress on Mathematical Education Keitel 1998 Surely it was time for an updated look at this critical area of mathematics education Second we have had lively discussion and working groups on gender issues at conferences of the International Group for the Psychology of Mathematics Education PME for the past four years sessions at which stimulating and ground breaking research has been discussed by participants from many different countries Some publication seemed essential to share this new knowledge emerging from a wider variety of countries and from different cultural perspectives Third some western countries such as Australia and the USA have experienced in recent years a focus on the boy problem with an underlying assumption that issues of females and mathematics have been solved and are no longer worthy of interest Thus it seemed timely to look more closely at the issue of gender and mathematics internationally When the idea for this volume first emerged invitations were issued to those regularly attending the working and discussion groups at PME Potential authors were charged to focus on gender issues in mathematics and were given wide scope to hone in on the issues that were central to their own research efforts or were in receipt or in need of close attention in their own national or regional contexts *Closing the School Discipline Gap* Daniel J. Losen, 2014-12-01 Educators remove over 3 45 million students from school annually for disciplinary reasons despite strong evidence that school suspension policies are harmful to students The research presented in this volume demonstrates that disciplinary policies and practices that schools control directly exacerbate today s profound inequities in educational opportunity and outcomes Part I explores how suspensions flow along the lines of race gender and disability status Part II examines potential remedies that show great promise including a district wide approach in Cleveland Ohio aimed at social and emotional learning strategies *Closing the School Discipline Gap* is a call for action that focuses on an area in which public schools can and should make powerful improvements in a relatively short period of time **Canal Town Youth** Julia Hall, 2001-01-11 This book considers how impoverished youth living in a deindustrialized urban neighborhood struggle to make sense of their lives in today s economy

Using participant observation and in depth interviews with a group of eighteen white middle school girls and boys who walk each day from their multi ethnic bilingual school to the historically white Irish community center the author discovered that the poor white youth are experiencing lives saturated with domestic violence and marked by a strong sense of racism She also found that the youth position the community center as a space in which they feel a sense of safety belonging and importance But upon closer examination the community center can also be seen as a literal white construction site where the scaffolding that supports and sustains white supremacist ideology is produced and encouraged within children within the neighborhood across communities and across generations
