The Paper Boomerang Book Mark Latno, 2010-06-01 When it comes to lightweight avionics there's no beating a paper boomerang. Let all the others chase after their dull folded airplanes; you can now build a flying device that comes right back to you every time. And unlike expensive heavy wooden boomerangs you won't endanger windows and skulls with paper boomerangs. The Paper Boomerang Book is the first of its kind: guide to this fascinating toy. Expert Mark Latno not only tells you how to build perfect and troubleshoot your paper boomerang but about the 20 000 year history of the device including Egyptian throwing sticks found in pharaoh's tombs and the physics behind their circuitous flights. And once you've mastered the basic throw, return and catch it's on to more impressive tricks: the Behind the Back Toss, the Boomerang Juggle, the Under the Leg Catch and the dreaded Double Handed Backward Double Boomerang Throw. For those who don't have the luxury of the wide open outback on a clear Australian day, author Latno includes plans for Little Dragons miniature versions of the paper boomerang that can be used indoors in almost any sized room, rain or shine.
