Edition now covering Generation III engines as well as Generation I it was an evolution of the earlier 4.6L and 5.4L Modular designs. Although the new Coyote engine had increased displacement it still had far fewer cubes than the competition. Despite less displacement the Coyote could hold its own against bigger Chevy and Chrysler mills thanks to advanced technology such as 4V heads with better port and valvetrain geometry. The Coyote is also Ford's first foray into technology that includes Ti-VCT and cam torque actuated CTA function which is a fancy way of saying variable cam timing for an incredible power curve over a broader RPM range. Now in Generation III Ford has implemented a system using both Port and Direct Fuel Injection taking advantage of the benefits of both systems in a single application. Even with all of this new technology there is always room for improvement. If you are looking for even more power from your new Coyote look no further than this volume.
