The Interplay Between Competition Law and Intellectual Property Gabriella Muscolo, Marina Tavassi, 2019-01-17

Although competition law and intellectual property are often interwoven until this book there has been little guidance on how they work together in practice As the intersection between the two fields continues to grow worldwide both in case law and in regulation the book s markets based approach focusing on sectors such as pharmaceuticals IT telecoms energy and agriculture in eleven of the world s most active jurisdictions provides a much needed in depth understanding of how this interplay reveals itself among the different legal systems Written by a range of authors including judges regulators academics economists and practitioners in both fields the book provides an international comparative perspective as well as detailed analysis of specific cases policies and proposals for change Among the issues and topics covered are the following free movement of goods and the protection of intellectual property rights standard essential patents intellectual property rights between technological development and consumer protection geo blocking online platforms and antitrust excessive prices In this context special attention is paid throughout to the increasing dialogue among Competition Authorities and between Judges and Competition Authorities around the world As matchless remedy for the lack of uniformity heretofore the book s investigation of the nexus between competition law and intellectual property in different sectors and in various countries takes a giant step towards a more balanced approach and more levelled regulation and practices It will be warmly appreciated by policy makers decision makers regulators practitioners and academics in both competition law and intellectual property fields
