*Emerging Sensor Technology in Agriculture* Sigfredo Fuentes, Carlos Poblete-Echeverria, 2020-11-25 Digital agriculture is gaining traction among scientists implementing different new and emerging sensor technologies to monitor complex soil plant atmosphere interactions in an accurate cost effective and user friendly manner This book presents some of the latest advances in this emerging area of research The diversity of applications in which digital agriculture can make an important difference in day to day farming decision making makes this discipline an important focus of research internationally

### **Remote Sensing of Leaf Area Index (LAI) and Other Vegetation Parameters** Francisco Javier

García-Haro, Hongliang Fang, Juan M. Lopez Sanchez, 2019-09-16 Monitoring of vegetation structure and functioning is critical to modeling terrestrial ecosystems and energy cycles In particular leaf area index LAI is an important structural property of vegetation used in many land surface vegetation climate and crop production models Canopy structure LAI fCover plant height and biomass and biochemical parameters leaf pigmentation and water content directly influence the radiative transfer process of sunlight in vegetation determining the amount of radiation measured by passive sensors in the visible and infrared portions of the electromagnetic spectrum Optical remote sensing RS methods build relationships exploiting in situ measurements and or as outputs of physical canopy radiative transfer models The increased availability of passive radar and LiDAR RS data has fostered their use in many applications for the analysis of land surface properties and processes thanks also to their insensitivity to weather conditions and the capability to exploit rich structural and textural information Data fusion and multi sensor integration techniques are pressing topics to fully exploit the information conveyed by both optical and microwave bands Innovations and Advanced Techniques in Systems, Computing Sciences and Software Engineering Khaled Elleithy, 2008-08-17 Innovations and Advanced Techniques in Systems Computing Sciences and Software Engineering includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Computer Science Software Engineering Computer Engineering and Systems Engineering and Sciences Innovations and Advanced Techniques in Systems Computing Sciences and Software Engineering includes selected papers form the conference proceedings of the International Conference on Systems Computing Sciences and Software Engineering SCSS 2007 which was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 2007 Ecological Aspects of Soil and Land Preservation Pasko, Olga Anatolievna, Lebedeva, Nadezhda Anatolievna, 2024-07-16 Agricultural lands worldwide are deteriorating becoming acidic and losing essential humus content This impacts global food quality and nutrition Causes include extreme natural events and harmful human activities like deforestation The consequences are stark shrinking agricultural land reduced fertility lower crop yields and increased costs Developing nations face food shortages population decline and shortened life expectancy The urgency demands international cooperation legislation and technological advancements Ecological Aspects of Soil and Land

Preservation delves into this critical issue emphasizing the need for collective action and sustainable solutions Ecological Aspects of Soil and Land Preservation serves as a resource for scholars students and professionals committed to addressing the crisis This book collects summarizes and analyzes the latest information on agricultural land and forest degradation Beyond that it introduces groundbreaking hypotheses theories and solutions enriching the scientific community s understanding The objective is clear to be an informative resource that not only sheds light on the problem but also catalyzes actionable solutions

Leaf Recognition and Matching with MATLAB ,2014 Imagine someone hiking in the Swiss mountains where he finds a weird leaf or flower This person has always been bad in biology but would like to know more about that plant What s its name Its main features Is it rare Is it protected Etc By simply taking a picture of the leaf with a Digital Camera he or she could feed it to the database in his computer and then get all the information regarding the leaf image through an automatic leaf recognition application In recent decades digital image processing image analysis and machine vision have been sharply developed and they have become a very important part of artificial intelligence and the interface between human and machine grounded theory and applied technology These technologies have been applied widely in industries medicine and agriculture Finger print recognition is well developed and face recognition is rapidly improving As part of this project the elaboration of such an application has been attempted The recognition of leaves from photographs implies several steps starting with image preprocessing feature extraction plant identification matching and testing and finally obtaining the results implemented in MATLAB While a botanist could be content with a system for recording a plant species discovered in its natural habitat to be identified and logged later this application aims at providing a detailed identification to hikers campers etc
