English Learning in the Digital Age Shuang

Zeng,2018-11-23 Moving beyond the Web 2.0 and digital native rhetoric this book addresses the complex experiences of learners of English as a foreign language EFL in a world embedded with interactive and participatory technologies Adopting a sociocultural perspective it investigates EFL learners behaviours concerning digital technology and guides exploration into their contextually mediated choices and learning practices in the 2.0 era The argument is developed on the basis of the findings of a mixed sequential study that focused on 1485 Chinese undergraduates use and non use of online tools and applications outside the English classroom Particular attention is paid to the role of context and agency when understanding their learning choices and behaviours in the context of digital technology In particular the book acknowledges the explanatory power of agency in the minority instances of good practices among these EFL learners At the same time it demonstrates that for most learners use of the current web is limited and mostly non interactive The barriers to 2.0 transfer are largely contextual and the so called communicative opportunities and participatory culture in particular did not fit into the learners sociocultural context of language learning Overall the compelling argument proposes that the technology facilitated changes in EFL practices are a bottom up process that is taking place in day to day situations and constrained by the learning context within which the learner is situated Based on these arguments the book provides a framework that challenges the existing beliefs about language learning with online technology and that contributes to our understanding of how context mediates EFL learners behaviours surrounding digital technologies It is a valuable resource for teachers researchers and policy makers providing them with insights into using digital technology to stimulate good learning practices outside the classroom

Multilingual Digital Storytelling Jim Anderson, Vicky Macleroy, 2016-03-02 Classrooms are increasingly multicultural in their social

composition and students are increasingly connected through digital media to local and global networks. However, pedagogy has failed to take full advantage of the opportunities these resources represent. Multilingual Digital Storytelling draws attention to the interfaces between learner engagement, creativity and critical digital literacy as well as addressing the multilingual within the multiliteracies framework. Addressing a significant gap in the field of multiliteracies by focusing on multilingualism, this book explores new digital spaces for language learning and methods of extending understandings of youth literacy in an increasingly interconnected world. Drawing on innovative and multi-site research projects based in mainstream and community schools in London and overseas, this book discusses how young people become engaged creatively and critically with literacy by demonstrating how digital storytelling can be used as a tool for language development. The book begins by considering linguistic, cultural, cognitive and social dimensions of language learning from a theoretical perspective, whilst the second part focuses on practical case studies that reflect and illustrate these theoretical principles. Offering a powerful new perspective on multiliteracies pedagogy, Multilingual Digital Storytelling will appeal to researchers and academics in the fields of education, applied linguistics, sociology and youth and community studies. It will also be an invaluable resource for teachers, teacher educators, curriculum planners and policymakers. **Inclusive**
