Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. What are some things that can damage a farmer's crops? Things that could damage farmer's crops could be the temperature, chemicals, and weather.
2. What can farmers do to protect their crops? Place them in a greenhouse or a controlled space.

Gizmo Warm-up

Many farmers use chemical **herbicides** to kill weeds and **insecticides** to kill insects. Using **genetic engineering**, scientists have developed ways to resist harmful crop pests. In the Genetic Engineering Gizmo, you will use genetic engineering techniques to create **genetically modified** corn.

Check that **Task 1** is selected. The Gizmo shows petri dishes that contain different strains of bacteria (white dots) and caterpillars (Lepidoptera sp. larvae). In the first challenge, your goal is to find bacteria that produce toxins that kill the caterpillars. Click **Play** (▶).

1. What do you observe? In four petri dishes, caterpillars died. In two of them, all four caterpillars died.
2. Which strains of bacteria were able to kill Lepidoptera sp. larvae? Genome of Bacterial strain #4, #5, #8, #10.

Were some more effective than others? Explain. Yes, #4 and #8 were the most effective because they were able to kill all of the caterpillars in the petri dish, while the other two didn't kill all of them.

Some bacteria are able to produce a toxin that kills Lepidoptera sp. larvae. Find out which gene is responsible for this toxin in the next step.

Ryzal Perdana,Gede Eka Putrawan,Sunyono,2021-03-24 We are delighted to introduce the Proceedings of the Second International Conference on Progressive Education ICOPE 2020 hosted by the Faculty of Teacher Training and Education Universitas Lampung Indonesia in the heart of the city Bandar Lampung on 16 and 17 October 2020 Due to the COVID 19 pandemic we took a model of an online organised event via Zoom The theme of the 2nd ICOPE 2020 was Exploring the New

Era of Education with various related topics including Science Education Technology and Learning Innovation Social and Humanities Education Education Management Early Childhood Education Primary Education Teacher Professional Development Curriculum and Instructions Assessment and Evaluation and Environmental Education This conference has invited academics researchers teachers practitioners and students worldwide to participate and exchange ideas experiences and research findings in the field of education to make a better more efficient and impactful teaching and learning This conference was attended by 190 participants and 160 presenters Four keynote papers were delivered at the conference the first two papers were delivered by Prof Emeritus Stephen D Krashen from the University of Southern California the USA and Prof Dr Bujang Rahman M Si from Universitas Lampung Indonesia The second two papers were presented by Prof Dr Habil Andrea Bencsik from the University of Pannonia Hungary and Dr Hisham bin Dzakiria from Universiti Utara Malaysia Malaysia In addition a total of 160 papers were also presented by registered presenters in the parallel sessions of the conference The conference represents the efforts of many individuals Coordination with the steering chairs was essential for the success of the conference We sincerely appreciate their constant support and guidance We would also like to express our gratitude to the organising committee members for putting much effort into ensuring the success of the day to day operation of the conference and the reviewers for their hard work in reviewing submissions We also thank the four invited keynote speakers for sharing their insights Finally the conference would not be possible without the excellent papers contributed by authors We thank all authors for their contributions and participation in the 2nd ICOPE 2020 We strongly believe that the 2nd ICOPE 2020 has provided a good forum for academics researchers teachers practitioners and students to address all aspects of education related issues in the current educational situation We feel honoured to serve the best recent scientific knowledge and development in education and hope that these proceedings will furnish scholars from all over the world with an excellent reference book We also expect that the future ICOPE conference will be more successful and stimulating Finally it was with great pleasure that we had the opportunity to host such a conference

Economic Development Programs for Cities, Counties and Towns John M. Levy, 1990-08-28 This completely updated and revised edition of Levy's highly regarded work examines the important changes in the economic world faced by communities since publication of the first edition in 1981 Much new material has been added to reflect the increasingly important role of state government heightened intermunicipal competition rising foreign investment the diminished availability of federal development funds and more Like the previous edition this is designed as a how to book for the practitioner as well as a resource for students of public administration planning and development economics The author provides a general framework for considering the pros and cons of various economic development approaches offers an overview of the new federal role in local economic development and the rationale for national economic development policy and presents a systematic discussion of local economic development techniques strategy financing and tax abatement federal and state programs and marketing and promotion

Following a general introduction Levy looks at the political context of economic development local government organizations and personnel and recent economic changes including the deindustrialization issue and foreign trade related matters Chapters on the role of the states reasonable expectations and local economic development in the national context are new to this edition as is a chapter that surveys actual practitioner experience in order to identify what does and does not work in local economic development Subsequent discussions focus on the use of public relations advertising and marketing in local government assessing economic development potential development planning and financing and labor markets and fiscal impacts An important addition to this edition is the inclusion of a simple generic PC based fiscal impact model Indispensable for anyone involved in local economic development this new edition offers a comprehensive look at the development situation faced by communities as we move into the 1990s

Soft Computing in Engineering Design and Manufacturing Pravir K. Chawdhry,Rajkumar Roy,Raj K. Pant,2012-12-06 Soft Computing has emerged as an important approach towards achieving intelligent computational paradigms where key elements are learning from experience in the presence of uncertainties fuzzy belief functions and evolution of the computing strategies of the learning agent itself Fuzzy neural and evolutionary computing are the three major themes of soft computing The book presents original research papers dealing with the theory of soft computing and its applications in engineering design and manufacturing The methodologies have been applied to a large variety of real life problems Application of soft computing has provided the opportunity to integrate human like vagueness and real life uncertainty to an otherwise hard computer programme Now a computer programme can learn adapt and evolve using soft computing The book identifies the strengths and limitations of soft computing techniques particularly with reference to their engineering applications The applications range from design optimisation to scheduling and image analysis Goal optimisation with incomplete information and under uncertainty is the key to solving real life problems in design and manufacturing Soft computing techniques presented in this book address these issues Computational complexity and efficient implementation of these techniques are also major concerns for realising useful industrial applications of soft computing The different parts in the book also address these issues The book contains 9 parts 8 of which are based on 00 papers from the 2nd On line World Conference on Soft Computing in Engineering Design and Manufacture WSC2

From Lambs to Lions Thomas Preston,2009-03-16 While many books discuss how nations can prevent the proliferation of biological and nuclear weapons this unique and controversial volume begins with the premise that these weapons will certainly multiply despite our desperate desire to slow this process How worried should we be and what should we do In From Lambs to Lions Thomas Preston examines current trends in the proliferation of nuclear and biological weapons capabilities know how and technologies for both state and non state actors and then projects these trends over the coming ten to fifteen years to assess how they might impact existing security relationships between states With a new preface to the paperback edition Thomas Preston also addresses the threat of biological and nuclear weapons proliferation

that faces the Obama administration How might a nuclear North Korea or Iran constrain U S freedom of action in its foreign or military policies How might U S security be impacted by the current biotechnical revolution and spread of bioweapons know how to opponents How might terror groups like Al Qaeda make use of such weapons in future attacks against the United States or its allies around the world These are the central most fundamental questions facing American security policy over the coming decades and to ignore them is to put ourselves at risk for new 9 11 style surprises For answers and for some potentially surprising reassurances this clear and informative book will be invaluable
