Science Fraud: Darwin's Plagiarism of Patrick Matthew's Theory Mike Sutton, 2023 Patrick Matthew in 1831 originated the complete theory of evolution by natural selection in his

book *On Naval Timber and Arboriculture* and did so before Charles Darwin and Alfred Wallace claimed to independently replicate it in 1858. Unjustly and against the Arago convention on priority, a ruling that gives origination of any science theory to the first to publish, Matthew has been illicitly denied his priority on the grounds he never influenced anyone with his breakthrough. Today, Big Data research has uncovered Darwin's science fraud by plagiarism, revealing evidence which proves beyond all reasonable doubt that he and Alfred Wallace both independently plagiarised the theory of evolution by natural selection from Patrick Matthew. Books have been newly unearthed in the publication record to show that at least 30 people cited Matthew's work in published literature before 1858 and that several were known influencers of Darwin's and Wallace's work in the field. Additionally, several people in Darwin's and Wallace's social circles were first to be second into print using original terms coined by Matthew in his bombshell breakthrough book. This book reveals all the newly unearthed data and essentially explains it alongside the deplorable treatment of Patrick Matthew in scholarly historical context. Dr Mike Sutton further reveals using social science participatory observation methods and experimental results how members of the so-called Darwin Industry, enabled and facilitated by the deliberate publication of falsehoods and other grossly misleading editing on Wikipedia, have disgracefully worked to re-bury these newly unearthed facts by means of knee-jerk blind sight, ignorant rejection, blatant and deliberate fact denial, censorship, persistent and serious workplace harassment, obscene social media abuse, poison pen emails, lies, mischievous misrepresentation, and repeat research plagiarism.

Psychiatric-Mental Health Nursing Jeffrey S. Jones, Joyce J. Fitzpatrick, Vickie L. Rogers, 2016-03-22 Thoroughly updated to correlate with DSM 5 diagnostic descriptions and QSEN guidelines, the second edition of this highly acclaimed undergraduate psychiatric nursing text features concrete strategies for establishing interpersonal relationships as the basis not only for working with the psychiatric patient population but as a timeless foundation for all nursing practice. The text guides students through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice. Modules designed to foster growth in therapeutic use of self, including the importance of boundary management, are integrated with psychodynamic and current neurobiological theories to provide sturdy theoretical underpinnings for practice. A wealth of descriptive psychiatric diagnoses of DSM 5 QSEN criteria and NANDA-based care plans, case scenarios, evidence-based practice, patient and family education tips, drug summary lists, and complementary and alternative therapy approaches populate the text. The main body of the book focuses on common mental illnesses and weaves both the psychodynamic and neurobiological concepts into evidence-based strategies for nursing interventions. Additional features such as examples of therapeutic dialogue and a Consumer Perspective featuring an actual consumer voice relating personal experience about living with a specific illness provide further guidance in understanding and adopting a relationship-based approach to nursing. Web links facilitate quick access to additional information, and NCLEX-style review questions prepare students for passing the NCLEX exam.
