

ECON 4214, Economics of Health Care

Problem Set 1, Comparative Advantage

Show your work.

Suppose there are two people, Abe and Nancy, and two goods, Food, F and Medical Care, M. The set of indifference curves of Abe $U_A(F_A, M_A)$ and Nancy $U_N(F_N, M_N)$ are given by

$$U_A = F_A^{0.3} M_A^{0.7}$$

$$U_N = F_N^{0.3} M_N^{0.7}.$$

Suppose also that Abe's initial endowment is $\{F_A^e, M_A^e\} = \{100, 16\}$ and Nancy's is $\{F_N^e, M_N^e\} = \{9, 9\}$.

1. If they do not trade, what is Abe's utility? Nancy's?
2. Forget Nancy for this question. Suppose Abe can have 100 units total of F and M. How much does he want of each?
3. Find a trade that would make both better off, but favors Abe. Hint: the best trade for Abe is hard to find, but using Abe's marginal utility of Food with respect to Medicine, $\frac{dU_A}{dF}$, and Nancy's $\frac{dU_N}{dF}$ you can fashion a trade that benefits both, moves toward the optimum and heavily favors him. Prove that your choice works.
4. Find a trade that would make both better off, but favors Nancy, and prove that it works.
5. Suppose Abe's utility is as valuable to society as Nancy's. What would maximize social welfare W ? Is this solution Pareto optimal? Hint: equate marginal utilities.
6. Given these answers, propose a trade between Abe and Nancy you think is fair, and defend your choice.
7. (Extra credit) Suppose there's a third person, Zoe, with the same utility function as Abe and Nancy, but $\{F_Z^e, M_Z^e\} = \{64, 16\}$. Propose an Abe/Nancy trade that's better for Nancy than the best offer Nancy will get from Zoe. Why are Zoe's opportunities to gain from trade less than Abe's or Nancy's? How might this change if there were three goods instead of two?

Health Economics Questions And Answers:

Theoretical Health Economics Hans Keiding, 2017-07-24 As a relatively young discipline health economics as it appears today contains many features which can be traced back to its beginnings Since it arose in the interface between the medical sciences and economics the way of dealing with problems were often influenced by traditions which were well established in the medical profession while the classical way of thinking of economists came was filtering through at a slower pace This means that much of both teaching and research in health economics puts the emphasis on collecting and analysing data on health and healthcare as well as on public and private outlays on healthcare This is an extreme useful and worthwhile activity and much new and valuable information is produced in this way but occasionally there is a need for in depth understanding of what is going on rather than an estimated equation which comes from nowhere This is where economic theory can offer some support The present book is an introduction to health economics where the emphasis is on theory with the aim of providing explanation of phenomena as far as possible given the current level of economics
