welcome to intro to art

In this class you will learn how to creatively problem solve and tackle artistic challenges, while learning life long skills such as persistence, reflection, observation, and self critique. As this is an introductory class you will begin the course with learning the basics and tackling new media and more challenging techniques as the year progresses. This course will set you up for a great foundation of skills to help you in higher level courses.

expectations

Be on time

Bring your pencil and sketchbook each day

Help with clean up daily
(even if it's not your mess!)

respect yourself, your peers
(this includes opinions and property!)
and school staff & property

take responsibility for your own learning
ie...ask for help on techniques or ideas,
also focused during work time given

You must ask permission to
use cellphones in class.

Cell phones need to be put into
the classroom holder at the
beginning of class.

You are allowed to listen to
music with headphones only
during "student work time"
You are not allowed to listen
during presentations, demos,
or any group instruction time.

Earbuds may not be worn during
instruction. Please remove them
from your ears.

Abuse of cell phones or
headphones will result
in loss of privilege.

cell phone policy

High School Art Syllabus Template

Michael Rajnik

High School Art Syllabus Template:

Moving Beyond the Grammatical Syllabus Jason Martel, 2021-12-06 In this concise and practical book Martel advocates for a content based approach to foreign language curriculum design that emphasizes communicative competence cognitive engagement and social justice Intended primarily for busy teachers with limited preparation time the book includes An introduction to content based instruction and its use to date in foreign language education Step by step strategies for designing content based unit plans lesson plans and assessments A complete curricular unit that serves as a guiding example including nine lesson plans and a summative assessment The book is accompanied by a website that will feature additional examples of content based curricular materials across a range of languages and proficiency levels available at <http://cbi.middcreate.net/movingbeyond>

The Art of Teaching Science Jack Hassard, Michael Dias, 2013-07-04 The Art of Teaching Science emphasizes a humanistic experiential and constructivist approach to teaching and learning and integrates a wide variety of pedagogical tools Becoming a science teacher is a creative process and this innovative textbook encourages students to construct ideas about science teaching through their interactions with peers mentors and instructors and through hands on minds on activities designed to foster a collaborative thoughtful learning environment This second edition retains key features such as inquiry based activities and case studies throughout while simultaneously adding new material on the impact of standardized testing on inquiry based science and explicit links to science teaching standards Also included are expanded resources like a comprehensive website a streamlined format and updated content making the experiential tools in the book even more useful for both pre and in service science teachers

Special Features Each chapter is organized into two sections one that focuses on content and theme and one that contains a variety of strategies for extending chapter concepts outside the classroom Case studies open each chapter to highlight real world scenarios and to connect theory to teaching practice Contains 33 Inquiry Activities that provide opportunities to explore the dimensions of science teaching and increase professional expertise Problems and Extensions On the Web Resources and Readings guide students to further critical investigation of important concepts and topics An extensive companion website includes even more student and instructor resources such as interviews with practicing science teachers articles from the literature chapter PowerPoint slides syllabus helpers additional case studies activities and more Visit <http://www.routledge.com/textbooks/9780415965286> to access this additional material

Resources in Education, 1997 **Differentiating Assessment in Middle and High School Mathematics and Science** Sheryn Spencer-Waterman, 2013-09-05 This book by Sheryn Spencer Waterman follows the bestselling Handbook on Differentiated Instruction for Middle and High Schools With numerous examples and strategies it is an all inclusive manual on assessing student readiness interests learning and thinking styles It includes examples of Pre Formative and Summative assessments Informal and formal assessments Oral and written assessments Project and performance assessments Highly structured and enrichment assessments for struggling to gifted students Assessment tools and rubrics

Syllabus ,1996 *High Possibility STEM Classrooms* Jane Hunter,2020-12-21 This book offers a new research based approach to STEM education in early elementary and middle years of schooling concentrating on building teacher agency and integrated approaches to teaching and learning in High Possibility STEM Classrooms Author Jane Hunter presents a globally oriented contemporary framework for powerful Integrated STEM based on mixed methods research data from three studies conducted in 14 schools in language diverse disadvantaged and urbanized communities in Australia Theory creativity life preparation public learning and contextual accommodations are all utilized to help educators create hands on inquiry led and project based approaches to STEM education in the classroom A set of highly accessible case studies is offered that places pedagogy at the center of practice an approach valuable for researchers school leaders and teachers alike Ultimately this text responds to the call for examples of what successful Integrated STEM teaching and learning looks like in schools The book concludes with an evidence based blueprint for preparing for less siloed and more transdisciplinary approaches to education in schools Hunter argues not only for High Possibility STEM Classrooms but for High Possibility STEM Schools enriching the dialogue around the future directions of STEM STEAM middle leadership technological literacies and assessment within contemporary classrooms

Resources in Education ,1997 How to Start Personal Histories and Genealogy Journalism Businesses Anne Hart,2006 Here s how to open your own genealogy family history journalism or personal history business This includes a genealogy course template and instruction on how to start and operate a home based business working with personal and oral histories genealogy family history and life story writing You also learn how to interview people what questions to ask and how to put together a business and or a course or book on any aspect of genealogy around the world journalism writing personal history and life story writing Start your own course using the genealogy course template to inspire you to develop your own specialties and niche areas Work with almost any ethnic group and create businesses ranging from DNA driven genealogy reporting services to family history memoirs writing or personal history videography services Use social history to find information such as female ancestors maiden names that had not been recorded using hidden and niche areas of information including ethnic religious and institutional sources such as widows military pension applications Develop genealogy and personal history classes anywhere You ll make history To start first you need to create a course syllabus either to teach beginners genealogy or to train professionals in other fields to use personal history techniques to find hidden information or organize information for the reports you generate for your clients or family You ll learn how to write social history by using genealogy journalism resources find hidden records and market your own course or write your book or report in many different areas of personal history and genealogy journalism Make family tree charts Start your own business club franchise or course

The Education Index ,1985 **Keys to the Secondary Classroom** Rain Bongolan, Ellen Moir, Wendy Baron,2009-11-16 The suggestions and tips give teachers a solid start to their year and help their students achieve This book has a unique focus on secondary teachers Janet Crews Secondary

Instructional Coordinator Clayton School District MO A blueprint for successful teaching an entire year of teaching methods in one volume This book is jam packed with practical useful forms to guarantee a meaningful year for both the students and especially the teacher Ronald W Poplau Social Studies Teacher Shawnee Mission Northwest High School KS An easy to use source for all the strategies you need to thrive in the secondary classroom Preparing adolescent students for today s increasing demands requires commitment organization subject matter knowledge and passion But with the right strategies and tools first year secondary school teachers can approach this challenge with greater confidence and ease Leveraging a wealth of information and research from the New Teacher Center this user friendly guide provides a solid foundation for classroom management lesson planning and assessment Teachers will learn step by step tips for organizing standards based curriculum across the content areas supported by extensive reproducible forms and go to references including lesson plans from exemplary math and language arts teachers The authors provide specific strategies for Reaching struggling readers Working with English learners and their families Designing lessons with assessment in mind Sustaining a passion for teaching Covering everything needed for your first year and beyond this guide provides invaluable insights on succeeding with adolescent students

Sources for a Better Education Piet Kommers, 2022-02-22 This textbook evolves from the intersection between Research Educational Information Technologies and recent Best Practices It offers diplomacy and erudite rhetoric in order to harvest from innovation projects and see how new professional needs for teachers are emerging day by day The volume launches the compact background for the 21st century education that every teacher faces after being in charge for 3 or 6 years after pre service training Sources for a better education refers to the deep understanding and to the incentives for encouraging teachers to leave the comfort zone and experiment the next steps into a further sophisticated professionalism without the threat of feeling in a Dilemma The first candidate for extending one s teaching effectiveness is to tailor one s teaching to the test to be expected Teaching to the Test is an understandable tactic however it endangers the students full understanding of underlying concepts and analogies The second candidate for professionalism is the deeper layer of knowledge on how curricular domains are related In simpler terms better teachers know how to bridge topics and subjects so that students develop a deeper understanding on the patterns and structure in knowledge The 21st century education prioritizes higher degrees of flexible divergent and abstract thinking so that creative problem solving comes into reach ICT tools for making prior knowledge explicit is a major example on how learners harvest upon prior knowledge thinking and intuition The third source for a better education is the courage to envisage one s meta knowledge in order to see patterns in learning and understanding The more conscious prior knowledge gets decompiled into genetic metaphors the better future learning can be anticipated The fourth asset for meta cognitive skills is the wide spectrum of tools that the web offers for building knowledge infra structures so that knowledge becomes transformed into problem solving skills the availability of knowledge is no longer sufficient for finding creative and authentic solutions in future situations This is the

case for both students and teachers By tradition the bottom up strategy from reproductive factual learning up to the levels of problem solving and creative thinking has been favoured The one click away access to information on the web asks a more strategic attitude from learners and practitioners to cope with the periphery between known and unknown so that a more effective meta cognition develops The fifth stimulus for more effective learning is the expanding impact of social media Social media tend to intimidate learners with incomplete understanding to jump on biases as delivered through political and conspiracy agendas This books aims at the challenge to build upon learners existential needs and developing interest for a longer term learning perspective Renaissance man and philosopher Piet Kommers presents us with an interesting question What makes education exciting His book covers a range of lessons learnt through research and practice covering philosophies and paradoxes ranging from learning to learn to machine learning for learning In 35 chapters he takes us on an exciting comprehensive journey of just about every conceivable aspect of technology and education This is a must have for every 21st Century bookshelf By Johannes Cronj professor of Digital Teaching and Learning in the Department of Information Technology at the Cape Peninsula University of Technology South Africa Piet Kommers has in 400 pages provided an overview of teaching based on practical experience It is not a summary of pedagogic models but a guide to important factors in how to motivate students and thus improve their learning New technologies changes teaching and we need to understand how application of such technologies can improve the learning This book provides such knowledge and I wish I had it when I started teaching at university many years ago By Jan Frick Professor Business School University of Stavanger Norway Piet Kommers delivers a very thorough book with a holistic perspective on Learning Technologies This book is a result of many years of experience that the author has in Higher Education It comprises lessons learned from the author s professional career including inputs from European Union research projects as well as diversified interactions with a wide range of Peoples and Cultures The result is a unique perspective that is a must read for anyone interested in Learning Technologies past present and future By Pedro Isaias associate professor at the Information Systems Technology Management School of The University of New South Wales UNSW Sydney Australia Distinguished Professor and Thinker Dr Piet Kommers presents the academic community with a new horizon on education that reflects the current and future technology trends in the e Learning and Fast Internet ubiquity The Book discusses the current and most recent advances in research and application of most effective learning methods in conjunction with the future directions in machine learning in support of learning The Book s 35 chapters present cutting edge technologies and state of the art learning methods in support of best educational practices and the student s best learning experience The Book is most valuable asset to educator s community pursuing the mission of excellence in the Third Millennium By Eduard Babulak Professor Computational Sciences Liberty University Lynchburg USA Well known scientist e learning expert and philosopher Piet Kommers presents us with an interesting question What makes education exciting His book covers a range of lessons learnt through research and practice covering

philosophies and paradoxes ranging from learning to learn to machine learning for learning In 35 chapters he takes us on an exciting comprehensive journey of just about every conceivable aspect of technology and education This is an interesting and useful publication for all educators as well as learners and must have for every 21st Century bookshelf By Eugenia Smyrnova Trybulska Dr hab associate professor Institute of Pedagogy Faculty of Art and Sciences of Education University of Silesia in Katowice Poland The book presents a mosaic of assets reflecting the vast international experience in research and realization of learning technologies of the author honourable professor of the UNESCO Chair in New information technologies in education for all Piet Kommers Describing various aspects of learning strategies approaches techniques and technologies in a concise way he engages the readers into the mental construction of a big picture and makes them reconsider routine processes of teaching and learning Exciting and thought provoking reading for educators researchers and devoted learners By professor Volodymyr Gritsenko Director of the International Research and Training Centre for Information Technologies and Systems National Academy of Sciences and Ministry of Education and Science of Ukraine Head of the UNESCO Chair

The Bible in the American Experience Claudia Setzer, David A. Shefferman, 2020-09-07 An interdisciplinary investigation of the Bible's place in American experience Much has changed since the Society of Biblical Literature's Bible in American Culture series was published in the 1980s but the influence of the Bible has not waned In the United States the stories themes and characters of the Bible continue to shape art literature music politics education and social movements to varying degrees In this volume contributors highlight new approaches that move beyond simple citation of texts and explore how biblical themes infuse US culture and how this process in turn transforms biblical traditions Features An examination of changes in the production transmission and consumption of the Bible An exploration of how Bible producers disseminate US experiences to a global audience An assessment of the factors that produce widespread myths about and nostalgia for a more biblically grounded nation

Mapping Critical Dance Studies in India Urmimala Sarkar Munsri, 2024-03-14 This book provides a critical understanding of dance studies in India bringing together various embodied practices identified loosely as dance It suggests an alternative reading of the history of patronage policies and institutionalized understanding of categories such as classical folk modern popular and Bollywood that hierarchizes some dances as more dance than others It is of great interest to scholars looking at performing arts such as dance as a tool for identity assertions It offers diverse possibilities of understanding dance through its inherent sociopolitical possibilities as a participatory or presentational tool for communication The multidisciplinary approach brings together perspectives from critical dance studies anthropology history and gender studies to connect embodied archives of different communities to create an intersectional methodology of studying dance in India as a powerful but marginal expressive art practice Accessible at multiple levels the content is relevant for undergraduate and postgraduate students as well as researchers across dance dance education theatre and performance studies
