Jxta Java P2p Programming Darren Govoni:

JXTA Daniel Brookshier, 2002 JXTA Java P2P Programming provides an invaluable introduction to this new technology filled with useful information and practical examples. It was created by members of the JXTA community sharing their real world experience to introduce developers to JXTA. It starts with the fundamentals of P2P and demonstrates how JXTA fulfills the P2P promise then covers the essentials of JXTA including the protocols the JXTA Shell and groups. Later chapters include case studies demonstrating JXTA to synchronize data and to create distributed applications. Includes a foreword by Juan Carlos Soto Group Marketing Manager for Project JXTA at Sun Microsystems and the jxta.org Open Source Community Manager. *Java P2P Unleashed* Robert Flenner, 2003 Java P2P Unleashed provides a single source for Java developers who want to develop P2P systems. The book explains the benefits of each technology and shows how to fit the P2P pieces together both in building new systems and integrating with existing ones. It starts with a discussion of the P2P architecture referencing similarities with existing familiar systems while previewing several types of P2P applications. It explains how to plan ahead for security, routing, performance and other issues when developing a P2P application. Each technology included in the book JXTA, Jini, JavaSpaces, J2EE Web services is approached from a P2P perspective focusing on implementation concerns Java developers will face while using them. The last section includes several large scale examples of different P2P applications: managing content, building communities, integrating services, routing messages and using intelligent agents to gather information. The final chapter looks ahead to future developments in Java P2P technologies. Distributed Hash Table Hao Zhang, Yonggang Wen, Haiyong Xie, Nenghai Yu, 2013-10-08 This SpringerBrief summarizes the development of Distributed Hash Table in both academic and industrial fields. It covers the main theory, platforms and applications of this key part in distributed systems and applications especially in large scale distributed environments. The authors teach the principles of several popular DHT platforms that can solve practical problems such as load balance, multiple replicas, consistency and latency. They also propose DHT based applications including multicast, anycast, distributed file systems, search, storage, content delivery, network file sharing and communication. These platforms and applications are used in both academic and commercial fields making Distributed Hash Table a valuable resource for researchers and industry professionals. **Java Web Services Unleashed** Robert J. Brunner, 2002 This text provides Java developers with in depth coverage of Web Services technology. It includes contributions from recognised Web Services experts and architects including the Web Services team at IBM. *Sams Teach Yourself J2EE in 21 Days* Martin Bond, 2002 Sams Teach Yourself J2EE in 21 Days introduces the Java 2 Enterprise Edition to Java programmers in 21 straightforward example driven lessons. **Aspect-oriented Programming with AspectJ** Ivan Kiselev, 2003 In a November 2001 Java Pro magazine article noted Java pundit Daniel Savarese states 'The days of Object Oriented Programming may be numbered. One day we may all be using Aspect Oriented Programming. While this may be hyperbole, the AOP brings certain needed improvements to the OOP. AspectJ is a Java based tool that allows

developers to apply standard Java syntax to AOP principles much as C allowed C programmers to use C syntax in an object oriented manner There are AspectJ add ons available for Borland s JBuilder Sun s Forte for Java and for the EMACS text editor Aspect Oriented Programming with AspectJ introduces AOP and the AspectJ tool The book also shows how by using existing Java programming knowledge the developer can use AOP in meaningful development work Identifikation von Musiknoten Martin Schmucker,2007 **EA JXTA**, LI,2001-12-20 **Mastering JXTA** Joseph D.
