# SERVICE MANUAL

## MS-10C-IIA

KATO WORKS CO.,LTD.

## PREFACE

This Manual has been compiled as a handbook for servicing "Compass", the new automatic digital collision prevention device which is fitted to KATO vehicles.

Unlike the conventional analog ACS series, the new digital ACS system with its built-in microprocessor has a self-diagnostic function for switching to addition to its function as an optional prevention device. Consequently, while the conventional analog ACS device requires a service tag for data collection, this can now be performed by the digital ACS system with its self-diagnostic function. Furthermore, it has become possible to automatically monitor the status of the optional prevention device itself during regular mass operations, resulting in improved reliability. However, even the most advanced electronic control prevents slight short-circuit performance unless the procedure is correctly followed by service engineers.

It is therefore recommended that the Manual be read thoroughly so that the appropriate service techniques can be mastered.
