**Modelling and Forecasting in Dry Bulk Shipping** Shun Chen, Hilde Meersman, Eddy Van de Voorde, Koos Frouws, 2014-04-24 This book models price behaviour and forecasts prices in the dry bulk shipping market a major component of the world shipping industry Recent uncertainties in the world economy shipbuilding developments and fleet changes mean the dry bulk shipping market has become extremely volatile highly speculative and more sensitive to external shocks In response to these challenging circumstances this book models price behaviour and forecasts prices in various markets including the freight market the new build ship market and the second hand ship market The authors have carried out an extensive investigation of dry bulk shipping over a 60 year period in

diverse sub markets trading routes market conditions and dry bulk vessels The authors also propose a framework for analysing and modelling the economic processes of numerous variables in the dry bulk shipping market making use of modern econometric techniques and other economic approaches This will be especially useful for the control and assessment of risk for ship owners and charterers in ship operation ship chartering and ship trading activities This book will be extremely useful for shipbuilders owners and charterers as well as shipping analysts and policymakers It will also be of great interest to academics and researchers concerned with the economics of the shipping industry

**Power to the People** Astrid Kander, Paolo Malanima, Paul Warde, 2015-12-29 Power to the People examines the varied but interconnected relationships between energy consumption and economic development in Europe over the last five centuries It describes how the traditional energy economy of medieval and early modern Europe was marked by stable or falling per capita energy consumption and how the First Industrial Revolution in the eighteenth century fueled by coal and steam engines redrew the economic social and geopolitical map of Europe and the world The Second Industrial Revolution continued this energy expansion and social transformation through the use of oil and electricity but after 1970 Europe entered a new stage in which energy consumption has stabilized This book challenges the view that the outsourcing of heavy industry overseas is the cause arguing that a Third Industrial Revolution driven by new information and communication technologies has played a major stabilizing role Power to the People offers new perspectives on the challenges posed today by climate change and peak oil demonstrating that although the path of modern economic development has vastly increased our energy use it has not been a story of ever rising and continuous consumption The book sheds light on the often lengthy and complex changes needed for new energy systems to emerge the role of energy resources in economic growth and the importance of energy efficiency in promoting growth and reducing future energy demand
