Barker,2021-02-02 In the 1920s newspapers and real estate developers colluded in a scheme to sell tiny vacation lots to subscribers A zealous advertising campaign spawned a land buying frenzy that sprouted dozens of waterfront summer colonies across the country The resulting legal social and environmental mayhem caused some of these communities to disappear or be drastically altered in character while others managed to survive more or less intact Drawing on newspaper accounts of the day this book explores how the scheme eluded accusations of fraud creating an assembly line for middle class resorts through a lucrative merger of real estate and journalism Pell Lake Wisconsin serves as a case study that yields the best evidence for determining if it was all a scam Told here for the first time the story of this unusual alliance and the communities it created offers lessons for today's entrepreneurs journalists advertisers real estate developers environmentalists and anyone who has ever lived in a resort community *Attack of the 50 Foot Blockchain* David Gerard,2017-07-24 An experimental new Internet based form of money is created that anyone can generate at home people build frightening firetrap computers full of video cards putting out so much heat that one operator is hospitalised with heatstroke and brain damage A young physics student starts a revolutionary new marketplace immune to State coercion he ends up ordering hits on people because they might threaten his great experiment and is jailed for life without parole Fully automated contractual systems are proposed to make business and the law work better the contracts people actually write are unregulated penny stock offerings whose fine print literally states that you are buying nothing of any value The biggest crowdfunding in history attracts 150 million on the promise that it will

This book provides a political history of urban traffic congestion in the twentieth century and explores how and why experts from a range of professional disciplines have attempted to solve what they have called the traffic problem. It draws on case studies of historical traffic projects in London to trace the relationship among technologies, infrastructures, politics and power on the capital's congested streets. From the visions of urban planners to the concrete realities of engineers and from the demands of traffic cops and economists to the new world of electronic surveillance, the book examines the political tensions embedded in the streets of our world cities. It also reveals the hand of capital in our traffic landscape. This book challenges conventional wisdom on urban traffic congestion, deploying a broad array of historical and material sources to tell a powerful account of how our cities work and why traffic remains such a problem. It is a welcome addition to literature on histories and geographies of urban mobility and will appeal to students and researchers in the fields of urban history, transport studies, historical geography, planning history and the history of technology. **Mark Lane Express**, 1896 **Bradstreet's**, 1894

Forest and Stream, 1890 *The Engineer*, 1865 **EU Law on Indications of Geographical Origin** Vadim Mantrov, 2014-07-03. The present book examines both theoretical and practical aspects of the law on indications of geographical origin (IGOs) within the framework of European Union (EU) law pursuing four distinct yet mutually related aims. First, it discusses theoretical issues of the law on IGOs including its historical foundations, terminology, principles of regulation, legal subjectivity, protection models and loss of protection. Second, it covers the EU law on IGOs from a systematic point of view. Particularly, the systematic review of the EU law on IGOs includes an in-depth analysis of and commentary on the relevant and applicable regulations. Third, it examines current legislative initiatives and further development options for the EU law on IGOs. Finally, it reveals the interrelation of the EU law on one hand and the national laws of EU Member States on the other with regard to IGOs, focusing on harmonized and non-harmonized areas of law. **The Electrical Journal**, 1897

The Freemason's Chronicle, 1892 *Global Organized Crime* Mitchel P. Roth, 2017-01-20. In the maelstrom of globalization and cyberspace, organized crime continues to defy definition. A diverse array of activities is perpetuated by criminal organizations, criminal groups and associations, and gangs, and it is clear that one specific label is no longer adequate. This book offers a uniquely global approach to organized crime and the multitude of forces that shape it in the 21st century. As well as discussing definitions of and the historical roots of organized crime, this book examines various forms of organized crime around the world: in the US, Mexico, Latin America and the Caribbean, Russia and Europe, Asia and Africa. This revised and updated new edition includes coverage of the rise of the Ndrangheta in Italy and their global expansion, the impact of drug legalization on organized crime and the problem of methamphetamine, organ trading, money laundering and animal poaching, changes in gang traditions and gangland penitentiaries, the decentralization of Mexican cartels, the growth of opium production in Myanmar and the drug war in Africa, and the advancement of ISIS and the emergence of the Silk Road and the Dark Net.
