*JavaTM Persistence with JPA* Daoqi Yang, 2010-03 This book introduces Java Persistence API 2.0 the latest Java technology on persisting Java objects into relational databases It is part of Java EE 6.0 standards but can be used in both Java SE and Java EE applications This is a new Java persistence standard based on object

relational mapping and utilizing object oriented features of Java It is expected to gradually replace JDBC and proprietary object relational mapping frameworks for most Java applications with database access Using JPA Java Persistence API consists of two main tasks The first task is to map Java classes and their fields properties to relational database tables and columns The second task is to manipulate create read update and delete Java objects so that the underlying JPA implementation translates Java operations into JDBC calls and executes SQL statements behind the scene JPA provides many easy to use features such as optimistic locking pessimistic locking lazy loading object caching bean validation and listeners for transactional events which would be daunting tasks for a typical developer to implement when using JDBC JPA makes software development fun and leads to improved productivity The book is written for Java developers and architects who know Java programming but want to learn this new and standard technology It is also aimed at experienced JPA developers who may use this book as a reference This book tries to be easy to understand and provides many useful code examples Also it tries to be complete in JPA coverage It has a special chapter on JPA design patterns and performance tuning The author hopes to provide a valuable book for novice and experienced JPA developers [http YangDaoqi info](http://YangDaoqi.info) for information on source code download and errata
