Appendix J and K to Marine Corps Warfighting Publications 5-1(MCWP 5-1), Marine Corps Planning Process (MCP) the Accelerated Marine Corps Planning Process (AMCP) and Rehearsal Types, Techniques, and Considerations , 2002 The Marine Corps Warfighting Publication 5 1 MCWP 5 1 was published in January 2000 and is the principle planning manual in the Marine Corps However the new process is directed at too high of a level to be the principle planning doctrine for the lower level units Therefore I have developed two appendices to the MCWP 5 1 to

improve the document's relevance to the regimental and battalion level. The two appendices are The Accelerated Marine Corps Planning Process (AMCPP) and Rehearsal Types, Techniques, and Considerations. The AMCPP is a technique for scaling MCPP to operationally realistic time constraints. However, it is not just doing MCPP fast. The AMCPP hinges on the commander, with the advice of his staff, making a decision very early in the process, then improving the decision with the remainder of the process. The end result is a solid and flexible plan that can be executed rapidly. At the regimental and battalion level, rehearsals are the key to achieving an implicit understanding of the plan and improving the probability for success. However, this portion of the planning process is often squandered due to poor rehearsal technique or failure to target the rehearsal to the appropriate audience. Therefore, this appendix offers several rehearsal techniques and planning considerations that, if adopted, will enhance the doctrinal instructions in this area. *Marine Corps Planning Process*, 2000

Marine Corps Planning Process, 2018 Manuals Combined: U.S. Marine Corps Basic Reconnaissance Course (BRC) References, Over 5,300 total pages. MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six-man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air Ground Task Force reconnaissance teams, they provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conducts depend on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include but are not limited to: Plan, coordinate, and conduct amphibious ground reconnaissance and surveillance to observe, identify, and report enemy activity and collect other information of military significance; Conduct specialized surveying to include underwater reconnaissance and/or demolitions, beach permeability, and topography; routes, bridges, structures, urban, rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized, with other forces, equipment, or personnel assist in specialized engineer, radio, and other special reconnaissance missions; Infiltrate mission areas by necessary means to include surface, subsurface, and airborne operations; Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air delivery, and resupply; Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions; Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area; Conduct limited-scale raids and ambushes. Just a SAMPLE of the included publications: BASIC RECONNAISSANCE COURSE PREPARATION GUIDE, RECONNAISSANCE RECON TRAINING AND READINESS T/R MANUAL, RECONNAISSANCE REPORTS GUIDE, GROUND RECONNAISSANCE OPERATIONS, GROUND COMBAT OPERATIONS, Supporting Arms Observer, Spotter, and Controller, DEEP AIR SUPPORT, SCOUTING AND PATROLLING, Civil Affairs, Tactics, Techniques, and Procedures, MAGTF Intelligence Production and Analysis.

medicine is the application of medical art and science in a military setting for the benefit of the military organization through optimal care of the combatant. Topics include the history of military medicine, leadership, the management and treatment of trauma and mass casualties in frequently austere field and ship environments, the humane clearing of the battlefield, vaccines and protection against exotic global pathogens, both manmade and naturally occurring, unique psychological stressors of war, biodefense against chemical and nuclear weapons, facilitating return to duty and the eventual return and reintegration of valuable human resources. This first of its kind textbook offers both authoritative scholarship and the experience of high level medical officers for the new medical officer within any of the armed services, ranging from medical, surgical, nursing, dental, veterinary and more. It also provides health education and research for the military health professionals deployed to save enlisted military lives and helps to educate medical students with military medical practices and leadership.

In the case of amphibious embarkation operations, a Marine expeditionary unit is used as an example throughout. This publication cancels MCRP 3 31B Amphibious Ships and Landing Craft Data Book dated 29 August 2001 and supersedes MCRP 4 11 3G Unit Embarkation Handbook dated 10 December 2004.

Concepts and Issues, U.S. Marines and Irregular Warfare Nicholas J. Schlosser, 2015. U.S. Marines in Irregular Warfare: Training and Education is a brief history that recounts how the U.S. Marine Corps adapted to fight the Global War on Terrorism during 2000-10. The Marine Corps has a long history of fighting irregular wars, including the Banana Wars in Central America during the 1920s and the Vietnam War during the 1960s. To battle the insurgencies in Iraq and Afghanistan, the Corps drew upon this experience while also implementing new plans and programs to better prepare Marines to carry out counterinsurgency operations. The Marine Corps updated the curriculum at the Command and Staff College and transformed the annual Combined Arms Exercise into Exercise Mojave Viper, an immersive training program that simulated the urban environments in which Marines would be operating in Southwest Asia. Most importantly, Marines adjusted in the field as battalion and company commanders drew on their basic training and education to devise innovative tactics to better combat the new threats they now faced, as this story shows. The Marine Corps did not undergo a radical transformation to fight in Iraq and Afghanistan but instead drew on principles that had defined it as a warfighting organization throughout most of its history.
