Revealing Schemes Scott Radnitz, 2021-05-18 Conspiracy theories are not just outlandish ideas They can also be political weapons Conspiracy theories have come to play an increasingly prominent role in political systems around the world In Revealing Schemes Scott Radnitz moves beyond psychological explanations for why people believe conspiracy theories to explore the politics surrounding them placing two questions at the center of his account What leads regimes to promote conspiracy claims And what effects do those claims have on politics and society Focusing on the former Soviet Union a region of the world where such theories have long thrived he shows that incumbent politicians tend to make conspiracy claims to demonstrate their knowledge and authority at moments of uncertainty and threat They emerge more often where there is serious political competition rather than unbridled autocracy and in response to events that challenge a regime's ability to rule Yet conspiracy theories can also be habit forming and persist as part of an official narrative even where immediate threats have subsided a strategy intended to strengthen regimes but that may inadvertently undermine them Revealing Schemes explores the causes consequences and contradictions of conspiracism in politics with an original collection of over 1 500 conspiracy claims from across the post Soviet region two national surveys and 12 focus groups At a time of heightened distrust in democratic institutions and rising illiberal populism around the world understanding how conspiracy theories operate in a region where democracy came late or never arrived can be instructive for concerned citizens everywhere

The Innocence of Pontius Pilate David Lloyd Dusenbury, 2021-12-01 The gospels and ancient historians agree Jesus was sentenced to death by Pontius Pilate the Roman imperial prefect in Jerusalem To this day Christians of all churches confess that Jesus died under Pontius Pilate But what exactly does that mean Within decades of Jesus' death Christians began suggesting that it was the Judean authorities who had crucified Jesus a notion later echoed in the Qur'an In the third century one philosopher raised the notion that although Pilate had condemned Jesus he'd done so justly this idea survives in one of the main strands of modern New Testament criticism So what is the truth of the matter And what is the history of that

truth David Lloyd Dusenbury reveals Pilate's innocence as not only a neglected theological question but a recurring theme in the history of European political thought He argues that Jesus' interrogation by Pilate and Augustine of Hippo's North African sermon on that trial led to the concept of secularity and the logic of tolerance emerging in early modern Europe Without the Roman trial of Jesus and the arguments over Pilate's innocence the history of empire from the first century to the twenty first would have been radically different

The Political Economy of Electricity Mark Cooper, 2017-04-24 Providing critical insights that will interest readers ranging from economists to environmentalists policymakers and politicians this book analyzes the economics and technology trends involved in the dilemma of decarbonization and addresses why aggressive policy is required in a capitalist political economy to create a sea change away from fossil fuels The environmental damage across the globe is a result of the success of capitalist industrialism 250 years of carbon pollution resulting from consumption of fossil fuels to drive the economy and the worldwide aspiration to ever increasing levels of economic development But capitalism has also produced the tools to solve the problems it has created in the form of a technological revolution in low carbon renewables distributed resources and intelligent systems to integrate supply and demand This book comprehensively examines the political economy of electricity and analyzes the challenge of transforming today's electricity sector to meet the dual goals of decarbonization and development expressed in the Paris Agreement Author Mark Cooper defines the dilemma of development and decarbonization as the great challenge facing the electricity industry and documents how the economic resources costs of a 100 percent renewable portfolio has declined to the point that decarbonization can pay for itself making the low carbon renewable technologies that enable desired environmental and public health benefits an easy sell He identifies the substantial benefit of increasing use of information communications and advanced control technologies shows how targeted innovation could speed the transition by a decade or two and lower the overall cost of the transition by as much as half and explains why the flexible multi stakeholder approach of the Paris Agreement is the correct approach **From**

What Is to What If Rob Hopkins, 2019-10-15 Big ideas that just might save the world The Guardian The founder of the international Transition Towns movement asks why true creative positive thinking is in decline asserts that it's more important now than ever and suggests ways our communities can revive and reclaim it In these times of deep division and deeper despair if there is a consensus about anything in the world it is that the future is going to be awful There is an epidemic of loneliness an epidemic of anxiety a mental health crisis of vast proportions especially among young people There is a rise in extremist movements and governments Catastrophic climate change Biodiversity loss Food insecurity The fracturing of ecosystems and communities beyond it seems repair The future to say nothing of the present looks grim But as Transition movement cofounder Rob Hopkins tells us there is plenty of evidence that things can change and cultures can change rapidly dramatically and unexpectedly for the better He has seen it happen around the world and in his own town of Totnes England where the community is becoming its own housing developer energy company enterprise incubator and local

food network with cascading benefits to the community that extend far beyond the projects themselves We do have the capability to effect dramatic change Hopkins argues but we re failing because we ve largely allowed our most critical tool to languish human imagination As defined by social reformer John Dewey imagination is the ability to look at things as if they could be otherwise The ability that is to ask What if And if there was ever a time when we needed that ability it is now Imagination is central to empathy to creating better lives to envisioning and then enacting a positive future Yet imagination is also demonstrably in decline at precisely the moment when we need it most In this passionate exploration Hopkins asks why imagination is in decline and what we must do to revive and reclaim it Once we do there is no end to what we might accomplish From What Is to What If is a call to action to reclaim and unleash our collective imagination told through the stories of individuals and communities around the world who are doing it now as we speak and witnessing often rapid and dramatic change for the better
