**Informed Watermarking** Joachim Eggers, Bernd Girod, 2012-12-06 This book deals with digital watermarking which is defined by the authors of this book as the art of hiding auxiliary information in digital data in a secure robust and imperceptible fashion Digital watermarking as a topic has a long history but before 1995 publications in scientific literature were almost absent From 1995 onwards however the number of publications on watermarking has been steadily increasing Today a number of workshops and conferences on this topic exist also a number of scientific journals on watermarking have been published This renewed scientific interest in digital watermarking has led very quickly to industrial interest as well In 1996 the Copy Protection Technical Working Group a voluntary consortium consisting of the movie industry the IT industry and the consumer electronics industry issued a call for watermarking technologies for the purpose of copy protection of DVD Video A few years later the Secure Digital Music Initiative issued a similar call in this case focusing on copy protection of digital music These two efforts have been only partially successful copy protection based on digital watermarking is not yet implemented on a large scale in any type of consumer device This current failure of watermarking to live up to its expectations finds its cause in a large number of reasons ranging from legal considerations and system aspects to the relative immaturity of watermarking as a technology

**The Differentiated Countryside** Philip Lowe, Terry Marsden and Jonathan Murdoch, Neil Ward, 2005-07-08 In the wake of BSE, the threat to ban fox hunting and Foot and Mouth disease, the English countryside appears to be in turmoil. Long-standing uses of rural space are in crisis and unsurprisingly political processes in rural areas are marked by conflicts between groups such as farmers, environmentalists, developers and local residents. Using an innovative theoretical approach based on networks of conventions, this book investigates the regionalisation of the English countryside through a series of case studies. These studies are based on a set of ideal types: the preserved countryside where environmental pressures are strongly expressed; the contested countryside where development processes are shaped by disputes between agrarian and environmental interests; and the paternalistic countryside where large landowners continue to oversee patterns of land development. It looks in detail at landowners, residents, politicians, planners, farmers and environmentalists and shows how these groups compete. The Differentiated Countryside argues that the countryside is increasingly governed by regional policies. It becomes hard to discern a single English countryside; we see the emergence of multiple countrysides, places where diverse modes of identity are expressed and differing forms of development take place. Such diversity, it is argued, now lies at the heart of rural England.

From Precaution to Profit Brian Gareau, 2013-01-29 This book challenges the oft-cited belief that the Montreal Protocol remains an exemplary global environmental agreement. Through a sociological analysis of the

political decision making process and controversies generated at Montreal Protocol meetings the book documents new ways global environmental governance is organized based on neoliberal ideals The book shows how neoliberalism as a dominant discourse and economic practice has become increasingly embedded in the Montreal Protocol and how global powers are able to act protectionist amid that discourse The book demonstrates how recent controversies involve much more than just economic protectionism per se it also involves the protection of the legitimacy of certain forms of scientific knowledge It traces the rise of a new form of disagreement between global powers members of the scientific community civil society and agro industry groups signaling the negative impact of neoliberal policies on ozone politics and global environmental governance more broadly The book reveals how global civil society groups involved in the Montreal Protocol are affected by the neoliberal discourse which has left them relatively ineffective in their efforts to push for environmental protection
