

Maths at University Interview Questions

Below is a list of questions that have been asked at interviews (mainly at Oxford/Cambridge, but also other universities too).

Sometimes the interviewer will gently ask such things as:

- Tell us about some maths books that you have been reading.
- Why do you want to study maths?
- What areas of maths do you like? (this is a prompt for the next question which will be on that topic!)

Mainly (particularly at Oxford/Cambridge) there is little or no gentle chit chat, and straight into the fun stuff like:

- Which is bigger 2^x or x^2 ?
- Draw $y = A(1 - e^{-Bx})^2$
- Differentiate $y = x^{\sin x}$
- Find an approximation to $1^4 + 2^4 + 3^4 + \dots + 100^4$
- Draw $y = \frac{e^\theta}{1 + e^\theta} \sin \theta$ and $x = \frac{e^\theta}{1 + e^\theta} \cos \theta$
- Draw $y = \cos x^{\cos x}$
- Prove $\frac{a}{b} + \frac{b}{a} \geq 2$
- Draw: $y = e^x$, $y = e^{-x}$, $y = \frac{e^x + e^{-x}}{2}$
- Draw $y = \frac{\sin x}{x}$
- Prove $n^7 - n$ is always divisible by 42.
- $(6 + \sqrt{37})^{20} = 4398704651 \dots \bullet 9999999999 437569 \dots$
Can you show why this number is so close to an integer?
- On a plane each individual point can be either red, white or blue. Prove that at some point on the plane two points will be at a distance of one unit apart and the same colour.

How to Get Any Job, Second Edition Donald Asher, 2009-10-20 Donald Asher America's career guru believes that success comes from an alignment of passion and preparation. First tip Your college major has very little to do with your job options. In fact you can get to virtually any life goal destination from virtually any starting point. Stephen Colbert was a philosophy major. Chad Hurley billionaire founder of YouTube was an art major. And while we're at it Albert Einstein was a high school drop out. Still think your college major will determine your life path. Think again. HOW TO GET ANY JOB is the first book that definitively answers the following questions and many more: What is life launch and how is it different from getting a job? Why do employers hire people like you? Which skills do employers value most? They're not what you think. How do non tech people get hired and thrive in tech companies? How do you set yourself up to get promoted? How do you prove you have skills that don't show up on your transcripts? How do you get experience if you can't get a job or have the wrong major? How can you get famous and influential people to help you? How do you hit restart if you get stuck in a dead end job out of college? What should you do if you're a graduate and living in your parents' basement? What should you do if you're a junior to make sure you don't end up in that basement? Whether you're twenty and still in college or twenty nine and still wondering how to start your life HOW TO GET ANY JOB offers the most creative and innovative thinking on life launch to date. It is used by college career centers nationwide.

Why we fear Henri Hyppönen, 2015-12-14 Why We Fear gets to grips with the essence of fear in life and in business Why We Fear uncovers the mechanisms of fear and the huge role this often misunderstood emotion plays in our daily lives At the same time it dismantles fear into understandable and actionable parts When fear is divided into its constituent parts the hidden workings of fear and fear based habits become visible In this way the book charts a road map for how to deal with this often destructive emotion and the heavy cost of fear in life and in business Fear has always been at the very core of human experience and yet people generally seem to believe that it is a force of nature outside their own control Fear is often seen as a mystical poorly understood influence that creeps up on us at the worst possible moment wrecks our performance dulls our wits and makes our lives shrink Why We Fear robs fear of this mystique In addition as Henkka Hyppönen points out fear is not always a disastrous and destructive force Sometimes a little injection of fear helps us to perform better as individuals and as teams
