MARK SCHEME for the November 2004 question papers

0580/0581 MATHEMATICS

0580/02, 0581/02 Paper 2 (Extended), maximum raw mark 70

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

- CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the November 2004 question papers for most IGCSE and GCE Advanced Level syllabuses.

Intelligent Computer Mathematics Jacques Carette,Lucas Dixon,Claudio Sacerdoti Coen,Stephen Watt,2009-07-06 As computers and communications technology advance greater opportunities arise for intelligent mathematical computation While computer algebra au mated deduction and mathematical publishing each have long and successful histories we are now seeing increasing opportunities for synergy among them The Conferences on Intelligent Computer Mathematics cicm 2009 is a c lection of co located meetings allowing researchers and practitioners active in these related areas to share recent results and identify the next challenges The speci c areas of the cicm conferences and workshops are described below but the unifying theme is the computerized handling of mathematical knowledge The successful formalization of much of mathematics as well as a better derstanding of its internal structure makes mathematical knowledge in many waysmore tractable than generalknowledge as traditionally treatedin arti cial intelligence Similarly we can also expect the problem of e ectively using ma ematical knowledge in automated ways to be much more tractable This is the goal of the work in the cicm conferences and workshops In the long view so ing the problems addressed by cicm is an important milestone in formulating the next generation of mathematical software

Assessing Mathematical Literacy Kaye Stacey,Ross Turner,2014-11-03 This book describes the design development delivery and impact of the mathematics assessment for the OECD Programme for International Student Assessment PISA First the origins of PISA s concept of mathematical literacy are discussed highlighting the underlying themes of mathematics as preparation for life after school and mathematical modelling of the real world and clarifying PISA s position within this part of the mathematics education territory The PISA mathematics framework is introduced as a significant milestone in the development and dissemination of these ideas The underlying mathematical competencies on which mathematical literacy so strongly depends are described along with a scheme to use them in item

creation and analysis The development and implementation of the PISA survey and the consequences for the outcomes are thoroughly discussed Different kinds of items for both paper based and computer based PISA surveys are exemplified by many publicly released items along with details of scoring The novel survey of the opportunity students have had to learn the mathematics promoted through PISA is explained The book concludes by surveying international impact It presents viewpoints of mathematics educators on how PISA and its constituent ideas and methods have influenced teaching and learning practices curriculum arrangements assessment practices and the educational debate more generally in fourteen countries

A Contemporary Theory of Mathematics Education Research Tony Brown, 2020-10-05 This book by passes both psychology and sociology to present an original social theory centered on seeing mathematical learning by everyone as an intrinsic dimension of how mathematics develops as a field in support of human activity Here mathematics is defined by how we collectively talk about it Drawing on psychoanalytic theory the student is seen as participating in the renewal of mathematics through their contributions to our collective gaze on mathematics as the field responds to ever new demands As such learning takes a critical stance on the standard initiations into current practices often promoted by formal education In the field of mathematics education researchers have moved from psychology where individual students were seen as following natural paths of development through existing mathematical knowledge to socio cultural models predicated on students being initiated into the human world and understood through the reflective gazes this world has of itself such as those found in comparisons of student learning in different countries This book addresses the domain purpose and functioning of contemporary research in mathematics education and is an original contribution to this theme The book is aimed at a mathematics education research audience It continues a dialogue with existing publications seen widely as a cutting edge and will also be of interest to students and practitioners in the fields of qualitative research social theory and psychology

Sadovnik, Susan F. Semel, 2010 For over four decades Basil Bernstein researched the internal organisation and educational context of the school specifically and educational systems generally In particular he was interested in the powerful forms of knowledge transmitted through schooling systems who gained access to these forms of knowledge how they did so and with what consequences His research began by examining the differences between language and communication patterns in the

institutions of the home family and of the school and extended to examining the structuring of pedagogic discourse from the level of the state to the classroom This collection brings together chapters by researchers from South Africa Portugal the United Kingdom United States and Australia to build on the theoretical concepts developed by Bernstein to explore issues of access and acquisition to school knowledge In addition contributors explore the strengths and limitations of Bernstein s work for understanding the structuring of educational institutions as well as the potential of the theory for assisting educators to make a difference in the lives of students
