

Section 1.1: Compound Interest

1. A bank offers a 5% annual interest rate compounded annually. If you deposit \$1000, how much money will you have after 10 years?

- a. The amount of money after 10 years is \$1629.
- b. The amount of money after 10 years is \$1500.
- c. The amount of money after 10 years is \$1250.
- d. The amount of money after 10 years is \$1000.

2. A bank offers a 5% annual interest rate compounded annually. If you deposit \$1000, how much money will you have after 10 years?

Answer: The amount of money after 10 years is \$1629. This is because the interest is compounded annually, meaning that the interest is added to the principal each year. The formula for compound interest is $A = P(1 + r)^n$, where A is the amount of money after n years, P is the principal amount, r is the annual interest rate, and n is the number of years. In this case, $P = 1000$, $r = 0.05$, and $n = 10$. Plugging these values into the formula gives $A = 1000(1 + 0.05)^{10} = 1000(1.05)^{10} \approx 1629$.

3. A bank offers a 5% annual interest rate compounded annually. If you deposit \$1000, how much money will you have after 10 years?
