Exploring Strategy 9th Edition Case 15:

Multinational Management Rien Segers, 2016-01-29 This casebook demonstrates that the future of global business lies in how well the multinational landscape is charted and how the importance of Asian market leaders is deeply embedded in it. It offers international management students and researchers an extensive guide to the business history, strategy development, and foreign market entry modes used by emerging Asian multinationals. The cases focus on well-known companies such as Lenovo, Alibaba, Infosys, Huawei, Panasonic, and Rakuten. These companies, all of which generate huge revenues in their own countries (e.g., in China, India, South Korea, Taiwan, Vietnam), are now becoming increasingly sophisticated and striving to become global brands while also enjoying the active support of their governments in terms of their international business. Readers will learn about the current multinational landscape in Asia, the management challenges, and the future implications for traditional western companies seeking to retain their market share. Chapters on corporate entrepreneurship, human resource management, and intercultural competence, and current branding trends in Asia, will provide a cutting-edge update on international business strategy for students and practitioners alike. Emergent Knowledge Strategies Ettore

Bolisani, Constantin Bratianu, 2017-07-06 This book is intended to spark a discourse on and contribute to finding a clear consensus in the debate between conceptualizing a knowledge strategy and planning a knowledge strategy. It explores the complex relationship between the notions of knowledge and strategy in the business context, one that is of practical importance to companies. After reviewing the extant literature, the book shows how the concept of knowledge strategies can be seen as a new perspective for exploring business strategies. It proposes a new approach that clarifies how planned and emergent knowledge strategies allow companies to make projections into the uncertain and unpredictable future that dominates today's economy. **Contributions of Africa's Indigenous Knowledge to the Wave of Digital Technology:**

Decolonial Perspectives Niyitunga, Eric Blanco, 2024-04-09 Africa's contributions to global technological advancements are often overlooked, with many scholars claiming that the continent has yet to contribute significantly to digital technology. This misconception stems from a need for more understanding and recognition of Africa's indigenous knowledge and its role in shaping the modern world. The education curriculum inherited from colonialism must differentiate Africa's values and culture from Western ideals, leading to a devaluation of Africa's mineral wealth in technological advancements. Additionally, the impact of historical events such as the Atlantic slave trade and colonialism on Africa's indigenous knowledge remains largely unexplored, further contributing to the misunderstanding of Africa's technological contributions. **Contributions of Africa's Indigenous Knowledge to the Wave of Digital Technology: Decolonial Perspectives** offers a comprehensive exploration of Africa's indigenous knowledge and its crucial role in the Fourth Industrial Revolution (4IR). By taking a decolonial perspective and examining the literature on African Studies, the book aims to shed light on Africa's significant contributions to digital technology. Through a qualitative research design and an exploratory approach, the book will collect and analyze data from

secondary sources to showcase Africa's rich technological advancements and history of innovations

management The authors argue that some models of strategic management are now of enhanced relevance for contemporary public services organizations especially when considering successive New Public Management reforms This observation has important consequences for the requisite work practices skills and knowledge bases of current public managers as they are increasingly being asked to act as strategic as well as operational managers Strategic Management in Public Services Organizations takes a strongly comparative and international perspective in addressing the fundamental issue of strategic management within diverse public administrative traditions The impact of strategic management on the performance of public agencies is examined and it is argued that the appropriate use of strategic management models depends on the politico administrative and cultural contexts of the public services organization in question concluding that there is no single best way to strategically lead public organisations This is an advanced textbook aimed at the postgraduate level particularly students on MPAs and MBAs with a public sector option or MScs in Public Policy and Public Management Transnational Higher Education in Computing Courses Jenny Carter, Clive Rosen, 2019-09-24 There has been exponential growth in transnational education TNE in the last few years as UK universities have looked to expand their markets Recipient countries have sought short cuts to developing their higher education provision which has proved a lucrative income stream for some universities But overseas collaborations are not without risk Recipient countries can be concerned with external influence over curricula quality being diluted and higher education being infected by neo imperialism These concerns are not without foundation There are risks for providers too Reputations can be damaged if academic standards are compromised Conflicts of interest can occur between quality of provision and the pot of gold on offer Staff can view overseas collaborations as distracting from their research and commitment to home students Computing is a particularly popular subject for TNE but critical thinking analysis independent learning and creativity can be compromised Preventing plagiarism is difficult Constant changes in technology result in constant curricula revision which causes severe problems for overseas collaborations This book focuses on TNE in the computing domain However cross cultural issues challenge TNE management and administration whatever the subject area If the ever present tensions are not continuously monitored they can quickly threaten the sustainability of the collaboration This book identifies many of the threats and some of the solutions The readership for this book is truly global Any international development officer in higher education considering an overseas collaboration will benefit from this book Any academic becoming engaged in or already involved with a TNE partnership either as provider or recipient will gain information and insight into the practice and issues Researchers in TNE will discover more lines of enquiry Students considering a course with an overseas provider or in coming to the UK to study will be better prepared thereby enabling a more fulfilling and rewarding experience Anyone who has an interest in TNE whether at the senior executive level operational level delivering programmes or as a recipient of TNE should read this book The wealth of experience gathered here will provoke questions prompt debate and offer solutions It has been written by people who know the issues bear the
