Exponents Workbook for Grades 9-10: Contains 100 Practice Questions with Answer Key Tahir

Yaqub, 2021-06-24 Exponents Practice Workbook for Grades 9 10 Contains 100 Practice Questions with Answer Key

Exponents are an important topic in Algebra and are widely used in problems. This workbook is designed for students of grades 9 and 10 to practice and master exponents. By the end of year 10, students must understand the laws of exponents and how to solve problems containing exponents, also called indices. This workbook contains 100 questions of varying difficulty levels in six different sections. There are no multiple choice questions; instead, students have to solve exponents and put their final answer in the answer box. Below each of the questions, some space has been provided for students to solve the problem. However, ask students to use their own copy if you want to reuse this workbook. The level of difficulty increases at each section, and more exponent rules are included at every stage. Parents and teachers can remove the two-page answer key at the end and give this workbook to students or your children. All the answers are on both sides of the last page, which can easily be removed. This workbook will provide enough practice for students to solve all types of exponent problems in the future.
