\*\*\*Wear your lab apron and eye cover at all times. Watch your time and be sure to clean up all equipment and working area each day before leaving.

### External Observation

Obtain a fetal pig and rinse off the excess preservative by holding it under running water. Lay the pig on its side in the dissecting pan and locate dorsal (back), ventral (belly), & lateral (side) surfaces. Also locate the anterior (head) and posterior (rear) ends.

A fetal pig has not been born yet, but its approximate age since conception can be estimated by measuring its length. Measure your pig's length from the tip of its snout to the base of its tail and record this on your hand-in. Use the length/age chart on this sheet or the inside cover of your dissection manual to determine the age of your fetal pig & record this.
