

## Field Observation Report

Field Observation Report of Introduction to Public Speaking On the basis of my ambition to one day become a political figure in the United States government, I was obliged to observe Introduction to Public Speaking, COM 110. Dr. Jason Ingram teaches Introduction to Public Speaking on Tuesdays and Thursdays from 6:00 pm to 7:15 pm in the College of Communications on North Campus.

I conducted my observation of COM 110 on September 8 and 10. According to the course syllabus, the main goal of this class is to educate students on the fundamentals of public speaking in order to advance critical reasoning skills and gain the ability to present a well-constructed speech (Ingram, course syllabus). The main concept of my study was to learn how reading, writing, and speaking were entailed in this course's curriculum.

COM 110 dignifies the meaning of effectively communicating a message to a particular audience group as a purpose for creating various types of speeches and strategies. It is embedded in the field of communication and the discipline of the social sciences. This course incorporates applications of strategic planning and critical thinking for supporting arguments, the determinants of the rhetorical situation, and audience awareness used to enhance communications skills for use in any public environment.

Through the practice of organizing the speech, reading and researching proven techniques and strategies for effectively communicating a message to the audience, and applying concepts in speeches and conducting peer reviews for future benefit, students are able to hone exceptional speaking techniques that they can later resort to in interviews, public forum, or any other oral aspect in their professional career. By taking advantage of the opportunity to observe Dr.

Ingram's class on two separate occasions, through interviewing a undergraduate and the professor himself, and by examining how public speaking impacts various careers, I came to grasp the notion through an assortment of ways why this course is an exceptional representation of its field and discipline. After a short amount of time observing Dr. Ingram's class, I came to comprehend how COM 110 helped students develop strong oral and critical thinking skills. This class can generally be classified as mainly a presentation-based class with some occasional lectures focusing on key concepts.

The main educational purpose of lecture-based days was to reinforce the content involved in the chapters that were assigned for homework the previous class. Dr. Ingram carried out this theme by having open class discussions on specific material and generalized public speaking topics. He stated in his syllabus that every class was an opportunity for someone to voice their opinions, to actively participate in an effort to create an intellectually stimulating learning environment and to ask questions or request additional information on material that is unclear (Ingr
