

DISCUSSION QUESTIONS

1.
 - a. Job order cost system and process cost system.
 - b. The job order cost system provides a separate record of each quantity of product that passes through the factory.
 - c. Process cost systems accumulate costs for each department or process within a factory.
2. Job order costing is used by firms that sell custom goods and services to customers. The job order system is frequently associated with firms that will produce a product or service specifically to a customer order.
3. Work in process
4.
 - a. Purchase invoice or receiving report
 - b. Materials requisition
5. A job cost sheet is the subsidiary ledger to the work in process control account. The cost of materials, labor, and overhead are listed on each separate job cost sheet for each job. A summary of all the job cost sheets during an accounting period is the basis for journal entries to the control accounts.
6. The clock card is a means of recording the hours spent by employees in the factory. The time ticket is a means of recording the time the employee spends on a specific job.
7. The predetermined overhead rate is computed using estimated amounts at the beginning of the period. This is because managers need timely information on the product costs of each job. If a company waited until all overhead costs were known at the end of the period, the allocated factory overhead would be accurate, but not timely. Only through timely reporting can managers adjust manufacturing methods or product pricing.
8.
 - a. The predetermined factory overhead rate is determined by dividing the estimated total factory overhead costs for the forthcoming year by an estimated activity base, one that reflects the consumption or use of factory overhead costs.
 - b. Direct labor cost, direct labor hours, and machine hours.
9.
 - a.
 - (1) If the amount of factory overhead applied is greater than the actual factory overhead incurred, factory overhead is overapplied.
 - (2) If the amount of actual factory overhead is greater than the amount applied, factory overhead incurred is underapplied.
 - b. Underapplied
 - c. Deferred credit
