Accounting for Sustainability: Asia Pacific Perspectives Ki-Hoon Lee, Stefan Schaltegger, 2018-01-30 This book advances the understanding of corporate sustainability and challenges and roles of sustainability accounting in the Asia Pacific region. The Asia Pacific region has shown fast economic growth for several decades which is expected to continue. In this context, Asia has become the production engine of the global economy. At the same time, scientific reports reveal that some planetary boundaries are crossed, for example relating to biodiversity and climate change. Companies in the Asia Pacific region are therefore increasingly challenged to reduce their environmental impacts, to document their social contribution and to contribute to sustainable development. Key approaches to identify sustainability problems and challenges to support improvement processes and to back up sustainability contributions include accounting and reporting. In contrast to the high relevance of accounting and reporting for corporate sustainability for the Asia Pacific region, academic research has so far been dominated by Western researchers and predominantly dealt with Western and Japanese cases and approaches. It is thus time to take account of Asian perspectives on accounting and reporting for sustainability in the Asia Pacific region.

Managerial Strategies and Solutions for Business Success in Asia Ordóñez de Pablos, Patricia, 2016-11-22 Globalization, sustainable development and technological applications all affect the current state of the business sector in Asia. This complex industry plays a vital part in the overall economic, social and political aspects of this region as well as on a larger international scale. *Managerial Strategies and Solutions for Business Success in Asia* is an authoritative reference source for the latest collection of research perspectives on the development and optimization of various business sectors across the Asian region and examines their role in the globalized economy. Highlighting pertinent topics across an interdisciplinary scale such as e-commerce, small and medium enterprises and tourism management, this book is ideally designed for academics, professionals, graduate students, policy makers and practitioners interested in emerging business and management practices in Asia.

**Financial Accounting for Management** Ambrish Gupta, 2008-09 *Financial Accounting for Management: An Analytical Perspective* focuses on the analysis and interpretation of financial information for strategic decision making to enable students and managers to formulate business strategies for revenue enhancement, cost economies, efficiency improvements, restructuring of operations and further expansion or diversification for creating and enhancing the shareholder's value. Though the book has MBA, MFC and MBE students as its primary audience, managers in the corporate sector and students of CA, CWA, CS, CFA and CAIIB will find it equally useful because of its practical orientation.

*Sustainability Management And Business Strategy In Asia* Katsuhiko Kokubu, Yoshiyuki Nagasaka, 2019-10-15 Sustainability is a concept that unifies the environment, economy and society and has spread as a key concept in enterprise management. The United Nations adopted the Sustainable Development Goals (SDGs) in 2015, which require worldwide efforts to reach a sustainable society and also applies to private enterprises. Sustainability should be developed in connection with

management strategy and Asia's role including that of Japan is important to improve global sustainability. This book addresses how sustainability management in the Asian context is currently practised and proposes practices for the future. Investigation of the effect of business domain characteristics on the integration of sustainability and management and elucidation of the process and features of EMCS Environmental Management Control System inside and outside of companies have been indicated. The book points that companies need to use and design Sustainability Management Control Systems in order to implement a CSR Corporate Social Responsibility strategy and match employees behavior to CSR activities. MFCA Material Flow Cost Accounting has started to expand rapidly into other Asian industries from Japan as a method of Environmental Management Control. The fundamental idea and procedure of MFCA and many case examples of Japanese MFCA have been reported. These findings help us to consider a policy for continuous use of MFCA. Moreover the relationship between Toyota Production System and MFCA has been explained and Material Flow Time Costing as a new management accounting concept is proposed. Based on the literature review the study has made recommendations for Asian companies strategic management and governmental policy making to improve both quality and quantity of sustainability disclosure in Asia. One of the papers has identified the development and implementation of social and environmental accounting by Indonesian state owned enterprises and their determining factors. In a Japanese manufacture the effect of smoothed production has been analyzed as an example of environmental management. This led to an increase in production quality without additional capital spending.

Forthcoming Books Rose Arny, 2003 **Regional Perspectives of Nature-based Solutions for Water: Benefits and Challenges** Nevelina Pachova, Perlie Velasco, Antonina Torrens, Veeriah Jegatheesan, 2023-01-06 Nature based solutions NbS are solutions inspired or supported by nature. They include ecosystem conservation and restoration measures as well as the creation or enhancement of natural processes in man made ecosystems such as cities. Recent interest in NbS has emphasized their importance for urban water management and cities across the world have begun to experiment with them. Experiences from different contexts however are not adequately captured and understood. This book aims to address this gap by compiling case studies and reviews that explore NbS for urban water management from different regions and perspectives and highlight emerging challenges and opportunities for harnessing their potential.
