Managing Water As An Economic Resource Development Policy Studies Series:

Managing Water as an Economic Resource James Winpenny, 2005-07-22 Water already a scarce resource is treated as though it were plentiful and free The task of supplying enough water of the required quality to growing populations is straining authorities and governments to the limit as the economic and environmental costs of new supply sources escalate and wasteful supply delivery and consumption systems persist *Managing Water as an Economic Resource* argues that the root of the crisis is the failure of suppliers and consumers to treat water as a scarce commodity with an economic value James Winpenny evaluates policies for the improved management of existing demand and draws on case studies from different countries as he discusses how policies could be implemented to treat water as an economic good conferring major economic financial and environmental benefits

Water Policy P. Howsam, R.C. Carter, 1996-09-19 This book examines some of the successes and failures of actual implementation of modern water policy options in the light of the principles and concepts which have emerged from the Rio Earth Summit the Dublin Statement and other international consensus The book attempts to share real practical experience at all levels local regional national and international emphasising the co operation between different professions and sectors that must take place to ensure adequate supplies of fresh water in future

Managing and Transforming Water Conflicts Jerome Delli Priscoli, Aaron T. Wolf, 2010-02-04 What is the one thing that no one can do without Water Where water crosses boundaries be they economic legal political or cultural the stage is set for disputes between different users trying to safeguard access to a vital resource while protecting the natural environment Without strategies to anticipate address and mediate between competing users intractable water conflicts are likely to become more frequent more intense and more disruptive around the world In this book Delli Priscoli and Wolf investigate the dynamics of water conflict and conflict resolution from the local to the international They explore the inexorable links between three facets of conflict management and transformation Alternative Dispute Resolution ADR public participation and institutional capacity This practical guide will be invaluable to water management professionals as well as to researchers and students in engineering economics geography geology and political science who are involved in any aspects of water management

Water Resources Research Catalog, 1966 **Community-based Water Law and Water Resource Management Reform in Developing Countries** Barbara C. P. Koppen, Mark Giordano, John Butterworth, 2007 The lack of sufficient access to clean water is a common problem faced by communities efforts to alleviate poverty and gender inequality and improve economic growth in developing countries While reforms have been implemented to manage water resources these have taken little notice of how people use and manage their water and have had limited effect at the ground level On the other hand regulations developed within communities are livelihood oriented and provide incentives for collective action but they can also be hierarchal enforcing power and gender inequalities This book shows how bringing together the strengths of community based laws rooted in user participation and the formalized legal systems of the public sector water

management regimes will be more able to reach their goals Selected Water Resources Abstracts ,1988 **Terracotta Reader** Parth Shah,Vidisha Maitra,2005 This Anthology Of Readings On The Environment Compiled Bu Ccs Comes Amidst The Cacophany Of Gloom And Doom And Shrill Cries For Greater Control By The State The Study Calls For A More Reasoned Approach One That Is Informed By A Liberal Perspective Limit The Role Of The State And Enhance The Space For Civil Society And Markets Assessing the outcomes of IWMI's research and interventions on irrigation management transfer Giordano, Meredith, Samad, Madar, Namara, Regassa,2006 The purpose of this paper is to summarize IIMI IWMI s past research and interventions related to irrigation management transfer and to document to the extent possible the academic policy and technical outcomes of these efforts The application of a range of direct and indirect measurement techniques suggests an overall positive contribution from IWMI to IMT theory and application **Water for Food Security, Nutrition and Social Justice** Lyla Mehta,Theib Oweis,Claudia Ringler,Barbara Schreiner,Shiney Varghese,2019-09-19 This book is the first comprehensive effort to bring together Water Food Security and Nutrition FSN in a way that goes beyond the traditional focus on irrigated agriculture Apart from looking at the role of water and sanitation for human well being it proposes alternative and more locally appropriate ways to address complex water management and governance challenges from the local to global levels against a backdrop of growing uncertainties The authors challenge mainstream supply oriented and neo Malthusian visions that argue for the need to increase the land area under irrigation in order to feed the world s growing population Instead they argue for a reframing of the debate concerning production processes waste food consumption and dietary patterns whilst proposing alternative strategies to improve water and land productivity putting the interests of marginalized and disenfranchized groups upfront The book highlights how accessing water for FSN can be challenging for small holders vulnerable and marginalized women and men and how water allocation systems and reform processes can negatively affect local people s informal rights The book argues for the need to improve policy coherence across water land and food and is original in making a case for strengthening the relationship between the human rights to water and food especially for marginalized women and men It will be of great interest to practitioners students and researchers working on water and food issues **Making the Most of the Water We Have** David B. Brooks,Oliver M. Brandes,Stephen Gurman,2009 Based on the soft path approach to the energy sector a transition is now under way to a soft path for water This approach starts by ensuring that ecosystem needs for water are satisfied and then undertakes a radical approach to reducing human uses of water by economic and social incentives including open decision making water markets and equitable pricing and the application of super efficient technology all applied in ways that avoid jeopardizing quality of life The soft path for water is therefore a management strategy that frees up water by curbing water waste This book is the first to present and apply the water soft path approach It has three aims to bring to a wider audience the concept and the potential of water soft paths to demonstrate that soft path analysis is analytical and practical and not justeco dreaming and to

indicate that soft paths are not only conceptually attractive but that they can be made economically and politically feasible Includes a tool kit for planners and other practitioners Published with POLIS Project and Friends of the Earth **Urban Water Planning** Herbert Alfred Swenson,1972 *The United Nations World Water Development Report - N° 3 - 2009 - IWRM Implementation in Basins, Sub-basins and Aquifers (State of the Art Review)* Kennedy Keith,2009 Water Management in India M. Dinesh Kumar,2020-06-29 This comprehensive volume explores the interface between politics and policy making in the water management sector of India The authors discuss the nature of the political discourse on water management in India and what characterizes this discourse They also explore how

this discourse has influenced the process of framing water related policies in India particularly through the academics bureaucrat politician nexus and the growing influence of the civil society groups on policy makers which are the defining feature of this process and which have produced certain policy outcomes that are not supported by sufficient scientific evidence The book reveals that the social and management sciences despite being increasingly relevant in contemporary water management are unable to impress upon traditional engineer dominated water administration to seek solutions to complex water problems owing to a lack of interdisciplinary perspective in their research The authors also examine the current deadlock in undertaking sectoral reforms due to existing water policies not being honoured This collection includes several research studies which suggest legal institutional policy alternatives for addressing the problems in areas such as irrigation rural and urban water supply flood control and adaptation to climate variability and change It was originally published as a special issue of the International Journal of Water Resources Development *Institutional Change and Shared Management of Water Resources in Large Canal Systems* D. J. Bandaragoda,1999 This report is based on the results of an action research program in pakistan conducted by the International Water Managament Institute IWMI An analysis of empirical data is presented in the light of existing theoretical knowledge on collective action for natural resources management the report also highlights the current constraints associated with a wider application of some of these findings which reflect the difficulties in pursuing large scale institutional reforms in the rural sector of developing countries finally the report raises some key research issues that need to be explored further **Water Resources Sector Strategy** ,2004-01-01 This paper focuses on how to improve the development and management of water resources while providing the principles that link resource management to the specific water using sectors In 1993 the Board of the World Bank endorsed a Water Resources Management Policy Paper In that paper and this Strategy water resources management is seen to comprise the institutional framework management instruments and the development maintenance and operation of infrastructure The paper looks at the dynamics of water and development It builds on the 1993 policy paper evaluating current scenarios and looking at future options and their implications both for government policy and the World Bank Managing Water in River Basins M. Dinesh Kumar,2010-06-23 This book provides an in depth analysis of existing methods of water management and highlights the gaps in the use of water in various river basins Underlying the futility of quick fix solutions it puts forward various alternative strategies for water management Using illustrative case studies the author lists major challenges in water management productivity improvement in key use sectors inter sectoral allocation trans boundary resource management and availability in deficient regions Highlighting the opportunities for improving water productivity in agriculture he also provides methodologies for generating country and regional level water balance scenarios The volume also discusses the problems involved in allocating water in river basins Kumar gives a detailed account of some of the widely known economic tools He examines the institutional and policy measures for ensuring sustainable use of water and economic growth including

the creation of new organizations Pricing Irrigation Water Yacov Tsur, 2010-09-30 As globalization links economies the value of a country's irrigation water becomes increasingly sensitive to competitive forces in world markets Water policy at the national and regional levels will need to accommodate these forces or water is likely to become undervalued The inefficient use of this resource will lessen a country's comparative advantage in world markets and slow its transition to higher incomes particularly in rural households While professionals widely agree on what constitutes sound water resource management they have not yet reached a consensus on the best ways of implementing policies Policymakers have considered pricing water a debated intervention in many variations Setting the price right some say may guide different types of users in efficient water use by sending a signal about the value of this resource Aside from efficiency itself an important policy objective equity accessibility and implementation costs associated with the right pricing must be considered Focusing on the examples of China Mexico Morocco South Africa and Turkey Pricing Irrigation Water provides a clear methodology for studying farm level demand for irrigation water This book is the first to link the macroeconomics of policies affecting trade to the microeconomics of water demand for irrigation and in the case of Morocco to link these forces to the creation of a water user rights market This type of market reform the contributors argue will result in growing economic benefits to both rural and urban households
