Essential Building Blocks of Human Nature Ulrich J. Frey, Charlotte Störmer, Kai P. Willführ, 2010-11-08 To understand why we humans are as we are it is necessary to look at the essential building blocks that comprise our nature The foundations of this structure are our evolutionary origins as primates and our social roots Upon these rest features such as our emotions language and aesthetic preferences with our self perceptions self deceptions and thirst for knowledge right at the top The unifying force holding these blocks together is evolutionary theory Evolution provides a deeper understanding of human nature and in particular of the common roots of these different perspectives To build a reliable and coherent model of man leading authors from fields as diverse as primatology anthropology neurobiology and philosophy have joined forces to present essays each describing their own expert perspective Together they provide a convincing and complete picture of our own human nature *Key Science* David Applin, 2002 Revised and updated to take account of the new co ordinated syllabuses under the National Curriculum this book offers a comprehensive and authoritative guide to biology *How We Do It* Robert Martin, 2013-06-11 Despite the widespread belief that natural is better when it comes to sex pregnancy and parenting most of us have no idea what natural really means the origins of our reproductive lives remain a mystery Why are a quarter of a billion sperm cells needed to fertilize one egg Are women really fertile for only a few days each month How long should babies be breast fed In *How We Do It* primatologist Robert Martin draws on forty years of research to locate the roots of everything from our sex cells to the way we care for newborns He examines the procreative history of humans as well as that of our primate kin to reveal what s really natural when it comes to making and raising babies and distinguish which behaviors we ought to continue and which we should not Although it s not realistic to raise our children like our ancestors did Martin s investigation reveals surprising consequences of and suggests ways to improve upon the way we do things now For instance he explains why choosing a midwife rather than an obstetrician may have a greater impact than we think on our birthing experience examines the advantages of breast feeding for both mothers and babies and suggests why babies may be ready for toilet training far earlier than is commonly practiced *How We Do It* offers much needed context for our reproductive and child rearing practices and shows that once we understand our evolutionary past we can consider what worked what didn t t and what it all means for the future of our species **Islamic Ethics and the Genome Question** , 2018-12-24 *Islamic Ethics and the Genome Question* is one of the very first academic works which examine the field of genomics from an Islamic perspective This twelve chapter volume presents the results from a pioneering seminar held in 2017 at the Research Center for Islamic Legislation Ethics College of Islamic Studies Hamad Bin Khalifa University in Qatar The contributors to this volume coming from different disciplines and specializations approached the key ethical questions raised by the emerging field of genomics viz the Genome Question GQ from various angles and perspectives Their shared thesis is that the breadth and depth of both the GQ and the Islamic tradition necessitate going beyond just producing quick

answers in response to immediate questions In order to accommodate the complexity and wide scope of the GQ the volume included critical analyses of the ethical discourse on genomics from outside the Islamic tradition Within the Islamic tradition the contributing authors explored how the QG can be better explored by involving insights from various disciplines including Quran exegesis Islamic jurisprudence philosophy and theology Besides its interest for researchers and students specialized in ethics bioethics and Islamic studies this volume will be a source of important information for geneticists genomicists and social scientists who are interested in the ethical discourse about genomics in the Muslim world Contributors include Arzoo Ahmed Abbas Amir Saadia Bendenia Mohammed Ghaly Mutaz al Khatib Amara Naceur Aasim I Padela Ayman Shabana Trevor Stammers Mehrunisha Suleman and Hub Zwart

Perspectives on the Politics of Abortion Ted G. Jelen, 1995-08-22 *Perspectives on the Politics of Abortion* examines the abortion issue from ethical empirical and legal angles and offers some rather unconventional analyses and surprising conclusions with regard to this familiar issue One chapter argues that the emphasis on rights has made illegal and occasionally violent activity on the part of pro life activists increasingly likely Another chapter suggests that abortion is an instance of the more general right to self defense A chapter considers the problem of abortion from the standpoint of participants in the political process And chapters examine the political tactics of the Roman Catholic Church and abortion rights in terms of constitutional due process This important volume adds new voices and perspectives to the abortion debate
