

Rabbit Population by Season

[Lesson Info](#)

DESCRIPTION

Observe the population of rabbits in an environment over many years. The land available to the rabbits and weather conditions can be adjusted to investigate the effects of urban sprawl and unusual weather on wildlife populations.

Questions & Answers

1. During which season does the rabbit population increase most rapidly?

- A. spring
- B. summer
- C. fall
- D. winter

Correct Answer: A. spring

Explanation: In the spring, the warm weather and the increase in the availability of food enable the populations to increase quickly. The end of severe winter weather reduces the likelihood of death due to extreme cold. Because of these favorable conditions, most animals give birth to their young in the spring.
