Discovering Psychology Sandra E. Hockenbury, Susan A. Nolan, 2018-12-07 Sandra Hockenbury and new coauthor Susan Nolan's remarkable textbook is grounded in the belief that all kinds of students can develop a real understanding of psychology and lasting scientific literacy The authors act on that belief by using relatable personal stories to communicate the concepts of psychological science and the process of science itself and by presenting important research in a clear not oversimplified way Hockenbury and Nolan also take full advantage of online learning creating activities in LaunchPad that have students thinking about psychology as scientists do New co author Susan Nolan of Seton Hall University was recently designated a Master Teacher by the Society for Teaching Psychology She regularly gives talks about incorporating scientific literacy into the introductory course and across the psychology curriculum

Simple Statistical Tests for Geography Danny McCarroll, 2016-11-03 This book is aimed directly at students of geography particularly those who lack confidence in manipulating numbers The aim is not to teach the mathematics behind statistical tests but to focus on the logic so that students can choose the most appropriate tests apply them in the most convenient way and make sense of the results Introductory chapters explain how to use statistical methods and then the tests are arranged according to the type of data that they require Diagrams are used to guide students toward the most appropriate tests The focus is on nonparametric methods that make very few assumptions and are appropriate for the kinds of data that many students will collect Parametric methods including Student's t tests correlation and regression are also covered Although aimed directly at geography students at senior undergraduate and graduate level this book provides an accessible introduction to a wide range of statistical methods and will be of value to students and researchers in allied disciplines including Earth and environmental science and the social sciences

The Oxford Handbook of Deaf Studies in Literacy Susan R.

Easterbrooks, Hannah M. Dostal, 2021 The Oxford Handbook of Deaf Studies in Literacy brings together state of the art research on literacy learning among deaf and hard of hearing learners DHH With contributions from experts in the field this volume covers topics such as the importance of language and cognition phonological or orthographic awareness morphosyntactic and vocabulary understanding reading comprehension and classroom engagement written language and learning among challenged populations Avoiding sweeping generalizations about DHH readers that overlook varied experiences this volume takes a nuanced approach providing readers with the research to help DHH students gain competence in reading comprehension **Validity of Educational Assessments in Chile and Latin America** Jorge Manzi, María Rosa García, Sandy Taut, 2021-09-11 This edited volume presents a systematic analysis of conceptual methodological and applied aspects related to the validation of educational tests used in Latin American countries Inspired by international standards on educational measurement and evaluation this book illustrates efforts that have been made in several countries to validate different types of educational assessments including student learning assessments measurements of non cognitive aspects in students teacher evaluations and tests for certification and selection It gathers the experience of validity studies from the main international assessments in Latin America PISA TIMSS ERCE and ICCS Additionally it shows the challenges that must be taken into account when evaluations are used to compare countries groups or trends of achievement over time The book builds on the premise that measurements in the educational field should not be used if there are no studies that support the validity of the interpretation of their scores or the use made of such tests It shows that despite the recognition given to validity relatively few educational measurement assessments have accumulated enough evidence to support their interpretation and use In doing so this volume increases awareness about the relevance of validity especially when assessments are key component of educational policies Minds Online Michelle D. Miller, 2014-10-20 For the Internet generation educational technology designed with the brain in mind offers a natural pathway to the pleasures and rewards of deep learning Drawing on neuroscience and cognitive psychology Michelle Miller shows how attention memory critical thinking and analytical reasoning can be enhanced through technology aided approaches Tests in Print , 1999
