Exploring Science 8 Test And Markscheme:

Aspects of Teaching Secondary Science Sandra Amos, Richard Boohan, 2003-09-02 This book's structure reflects the different dimensions to learning science. The first section focuses on the importance of talk in the science classroom while the second explores the key role of practical work. The third section is concerned with the creative/theoretical aspect of science. Section four follows this by considering the communication of ideas and how pupils learn to participate in the discourse of the scientific community. Section five emphasizes the place of science in the broader context, considering its moral and ethical dimensions and its place in a cultural context. Finally, section six explores the complexity of the task faced by science teachers, highlighting the knowledge and skills science teachers must acquire in order to create an environment in which students are motivated to learn science.
