A Complete Study Guide for Technician, General, Extra Class Ham Radio Exams, and the Volunteer Examiner's Test Joseph Lumpkin, 2012 Technician Class pool valid until June 30 2018 General Class pool valid until June 30 2015 Extra Class pool valid until June 30 2016 Don't think of a black cat Don't think of a black cat Do not think of a black cat The brain does not process negatives very well It takes in information first and then later attempts to filter out false data To expose someone to incorrect answers on a test is to place fraudulent information in memory and then say to the brain Don't remember these answers It is for this reason the only answers you will encounter in this book are the correct ones For those who wish to memorize only the answers there are no formulas needed no math no electronics or theories to learn This manual contains the answers to all possible questions in all tests from Technician Class General Class and Extra Class license tests In addition the manual also provides the answers to the Volunteer Examiner's test However many people want to know why and many need a framework on which to relate the answers That is why this book is arranged so that theories formulas rules and regulations are explained in separate chapters General theories and concepts of electronics and antenna design along with FCC regulations are presented to the reader Formulas explanations and diagrams from various sources give the reader all the information needed to pass the licensing tests all in one book This is a two pronged approach You chose the path that is best for you
