World War II Records in the Cartographic and Architectural Branch of the National Archives United States. National Archives and Records Administration,1992 *Warships of the Soviet Fleets 1939-1945* Przemyslaw Budzbon,Jan Radziemski,Marek Twardowski,2022-10-30 Seventy five years after the end of the Second World War the details of Soviet ships their activities and fates remain an enigma to the West In wartime such information was classified and after a brief period of glasnost openness the Russian state has again restricted access to historical archives Therefore the value and originality of this work is difficult to exaggerate It sees the first publication of reliable data on both the seagoing fleets and riverine flotillas of the Soviet Navy listing over 6200 vessels from battleships to river gunboats and mercantile conversions as well as purpose built warships Divided into three volumes this first covers major surface warships down to MTBs and armored gunboats as well as submarines For every class there is a design history analyzing strategic tactical and technical considerations and individual ship detail includes construction yard key building dates commissioning fleet designations relocations and ultimate fate Once a closely guarded secret the wartime loss of every ship and boat over 1000 is described Furthermore the confusion caused by frequent name changes is clarified by indexes that run to 16 000 items By following the ships through both their wartime and earlier history the book reveals many aspects of Russian history that remain highly sensitive clandestine co operation with Weimar Germany and fascist Italy the NKVD enforced closure of Soviet borders the Gulag Fleet the faked Metallist sinking that excused the military occupation of Estonia and the ill conceived pact with Nazi Germany Restrictions recently imposed on historical publications in Russia mean this book could certainly not have been published there as proven by the fact that most of the authors Russian collaborators preferred not to disclose their identities This is undoubtedly one of the most important naval reference works of recent years and will be welcomed by anyone with an interest in warships the Soviet Navy or wider maritime aspects of the Second World War

Nazi Conspiracy and Aggression (Complete) Various Authors,2000-01-01 On the 2d day of May 1945 President Truman signed Executive Order 9547 appointing Justice Robert H Jackson as Representative of the United States and as its Chief of Counsel

in the preparation and prosecution of the case against the major Axis war criminals Since that date and up to the present the staff of the Office of Chief of Counsel or OCC has been engaged continuously in the discovery collection examination translation and marshalling of documentary evidence demonstrating the criminality of the former leaders of the German Reich Since the 20th day of November 1945 a considerable part of this documentary arsenal has been directed against the 22 major Nazi war criminals who are on trial before the International Military Tribunal in Nurnberg As of this writing the American and British cases in chief on Counts I and II of the Indictment charging respectively conspiracy and the waging of wars of aggression have been completed There is perhaps no need to recall in these pages that the Nurnberg trial represents the first time in history that legal proceedings have been instituted against leaders of an enemy nation It is perhaps equal supererogation to state here that there are no exact precedents for the charges made by the American British French and Russian prosecutors that to plot or wage a war of aggression is a crime for which individuals may be punished Yet it was because of these very facts that in its indictment the prosecution presented a challenge to itself quite as great as to the defense A heavy burden was laid on the accusing nations to make sure that their proof measured up to the magnitude of their accusations and that the daring of their grand conception was matched by the industry of their research lest the hard bought opportunity to make International Law a guardian of peace should fail by default It is not surprising therefore that the American collecting and processing of documentary evidence under the general direction of Col Robert G Storey gradually developed into an operation of formidable scope Although some pieces of evidence were secured in Washington and London by far the greater part was obtained in the land of the enemy As the American Armies had swept into Germany military investigating teams had filled document centers with an increasing wealth of materials which were freely made available by the Army to OCC field investigators Special assistance was given by the Document Section G 2 Division SHAEF and by the Document Sections of the Army Groups and Armies operating in the European Theater OCC investigators also made valuable discoveries while prospecting on their own They soon found themselves embarrassed with riches Perhaps foremost among the prize acquisitions was the neatly crated collection of all the personal and official correspondence of Alfred Rosenberg together with a great quantity of Nazi Party correspondence This cache was discovered behind a false wall in an old castle in Eastern Bavaria where it had been sent for safekeeping Another outstanding collection consisted of thirty nine leather bound volumes containing detailed inventories of the art treasures of Europe which had been looted by the Einsatzstab Rosenberg These catalogues together with much of the priceless plunder itself were found hidden deep in an Austrian salt mine An innocent appearing castle near Marburg was found to contain some 485 tons of crated papers which inspection revealed to be the records of the German Foreign Office from 1837 to 1944 Among other outstanding bulk acquisitions were more than 300 crates of German High Command files 85 notebooks containing minutes of Hitler s conferences and the complete files of the German Navy
