Fela is a third-grade student in a public school. She is a speaker of African American Vernacular English (AAVE) who has difficulty with the Standard American English (SAE) dialect used in her classroom. Her teacher believes that Fela's language skills are affecting her academic performance and has referred her to the school's speech-language pathologist. Which of the following is an appropriate rationale for providing language intervention for Fela?

- A. It will likely foster better communication with Fela's linguistically and culturally diverse peers.
- B. It will likely improve Fela's code-switching ability with her teacher and other adult speakers of SAE.
- C. It may expand Fela's later academic and vocational opportunities.
- D. It will likely lead Fela to adopt SAE as her primary dialect. - Options (A), (B), and (C) are correct. The intervention will foster better communication because Fela and her peers will have a common dialect. Also, the intervention will provide Fela with the ability to switch easily between dialects using SAE structures. Furthermore, being able to switch codes will enable Fela to participate in more educational and vocational opportunities.
