With chapters written by an international team of leading regional education experts, the book explores the education systems of each country in the region. With chapters covering Botswana, Lesotho, Madagascar, Mozambique, Namibia, South Africa, Swaziland, and Zimbabwe, the book critically examines the development of education provision in each country as well as local and global contexts. Including a comparative introduction to the issues facing education in the region as a whole and guides to available online datasets, this handbook will be an essential reference for researchers, scholars, international agencies, and policy makers at all levels. D'Mello, 2022-08-10 *Key Questions in Environmental Toxicology* is designed as a self study tool for undergraduate students. Questions review the origin, characterization, and environmental distribution of major pollutants followed by their absorption and metabolic disposition in living organisms. They address implications for the development of cancer, cardiovascular disease, pulmonary dysfunction, and neurological conditions in relation to gaseous pollutants, particulates, persistent organic compounds, and radioactive emissions, then cover the impact of pollutants on biodiversity, food safety, and water contamination. Providing support to programmes across environmental science, ecology, and human health, and covering all the major biological toxins and pollutants as well as unintended consequences of actions designed to improve outcomes, this book may be used in conjunction with the companion volume *Introduction to Environmental Toxicology*. **Worklife**, 1976 Schooling in Sub-Saharan Africa Clive Harber, 2017-07-12 This book is a comprehensive text for those interested in formal education in sub-Saharan Africa. It provides a thought provoking overview of the key educational ideas, themes, and issues facing schooling in Africa today by drawing on a wide literature to examine evidence concerning both educational policy and the working realities of primary and secondary schools in Africa. Based on the author's forty years of experience in researching and publishing on education in Africa, it takes a balanced but critical approach to analysing education in Africa and discusses both positive and negative patterns across the region as well as identifying differences between and within countries. The book examines major questions of educational provision, structure, content, and process but does so in a way that raises challenging questions about gender inequality, violence, authoritarianism.
