Geography Mapwork Gis:

How to Lead it: Primary Geography Emma Lennard, 2025-09-11 Finding it hard to know what to prioritise as subject lead or how to work out which research is relevant and how it applies to your subject The How to Lead It series are the go to guides for primary subject leads in schools and trusts In them you will find clear summaries of relevant research and thinking around best practice age specific and inclusive classroom examples case studies reflective questions suggestions for short PD sessions with colleagues Everything in the book is applied thoughtfully to your specific subject area These books enable busy subject leaders to confidently make good decisions for effective teaching and impactful curricula All the key elements of the primary geography curriculum are explored including curriculum design assessment writing questioning fieldwork and map work as well as support on how to approach research and a step by step guide to implementing changes in realistic and inclusive ways

Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

Learning Progressions in Geography Education Osvaldo Muñiz Solari, Michael Solem, Richard Boehm, 2016-07-30 This book informs an international audience of teachers scholars and policymakers about the development of learning progressions for primary and secondary geography education in various countries and regions of the world The book represents an important contribution to learning progressions research and practice The different chapters

explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning of geography The book compares educational systems and how teachers and curriculum developers use the concept of learning progression to guide educational practices As an approach to educational research learning progressions offer considerable potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards The book analyzes the general conditions of learning progressions within the context of a globalized world Important themes are addressed such as knowledge acquisition in formal education measuring learning progressions in informal settings learning progressions for one curriculum standard or several standards conditions to assess progression in the learning of facts concepts and skills and multiple pathways for understanding or learning geography The contributing authors are experienced scientists in the field from all around the world giving specific insights into the practices of their countries The book appeals to K 12 teachers school administrators policymakers researchers in geography education professors and lecturers at universities around the world *Geography Education in the Digital World* Nicola Walshe, Grace Healy, 2020-10-07 Geography Education in the Digital World draws on theory and practice to provide a critical exploration of the role and practice of geography education within the digital world It considers how living within a digital world influences teacher identity and professionalism and is changing young people's lives The book moves beyond the applied perspective of educational technology to engage with wider social and ethical issues of technology implementation and use of digital data within geography education Situated at the intersection between research and practice chapters draw on a wide range of theory to consider the role adoption and potential challenges of a range of digital technologies in furthering geographical education for future generations Bringing together academics from the fields of geography geography education and teacher education the book engages with four key themes within the digital world Professional practice and personal identities Geographical sources and connections Geospatial technologies Geographical fieldwork This is a crucial read for geographers geography educators and geography teacher educators as well as those engaging with existing and new technologies to support geographical learning in the dynamic context of the digital world It will also be of interest to any students academics and policymakers wanting to better understand the impact of digital media on education

The Origin and Growth of Geography as a discipline at South Africa Universities

Gustav Visser, 2016-09-20 The publication provides the first comprehensive text that reflects on a century of the development of geography as an academic discipline at South African universities The book showcases a broad and textured review of South Africa's geography departments their staff members their times and the different Geographies they engaged in The book lays the foundation from which more expansive individual departmental histories can be written in the future

Springer Handbook of Geographic Information Wolfgang Kresse, David M. Danko, 2012-02-21 Computer science provides a powerful tool that was virtually unknown three generations ago Some of the classical fields of knowledge are geodesy

surveying cartography and geography Electronics have revolutionized geodetic methods Cartography has faced the dominance of the computer that results in simplified cartographic products All three fields make use of basic components such as the Internet and databases The Springer Handbook of Geographic Information is organized in three parts Basics Geographic Information and Applications Some parts of the basics belong to the larger field of computer science However the reader gets a comprehensive view on geographic information because the topics selected from computer science have a close relation to geographic information The Springer Handbook of Geographic Information is written for scientists at universities and industry as well as advanced and PhD students
