Improving Student Comprehension of Stoichiometric Concepts Connie Lynn Bannick Kemner, 2007

Small-Scale Synthesis of Laboratory Reagents with Reaction Modeling Leonid Lerner, 2011-02-16 The in lab preparation of certain chemical reagents provides a number of advantages over purchasing various commercially prepared samples This is especially true in isolated regions where acquiring the necessary substances from overseas can cause undue delay and inconvenience due to restrictions on the transportation of hazardous chemicals An inv *Opening Up Education* Toru Iiyoshi, M.S. Vijay Kumar, 2010-09-24 Experts discuss the potential for open education tools resources and knowledge to transform the economics and ecology of education Given the abundance of open education initiatives that aim to make educational assets freely available online the time seems ripe to explore the potential of open education to transform the economics and ecology of education Despite the diversity of tools and resources already available from well packaged course materials to simple games for students self learners faculty and educational institutions we have yet to take full advantage of shared knowledge about how these are being used what local innovations are emerging and how to learn from and build on the experiences of others Opening Up Education argues that we must develop not only the technical capability but also the intellectual capacity for transforming tacit pedagogical knowledge into commonly usable and visible knowledge by providing incentives for faculty to use and contribute to open education goods and by looking beyond institutional boundaries to connect a variety of settings and open source entrepreneurs These essays by leaders in open education describe successes challenges and opportunities they have found in a range of open education initiatives They approach from both macro and micro perspectives the central question of how open education tools resources and knowledge can improve the quality of education The contributors from leading foundations academic institutions associations and projects discuss the strategic underpinnings of their efforts first in terms of technology then content and finally knowledge They also address the impact of their projects and how close they come to achieving a vision of sustainable transformative educational opportunities that amounts to much more than pervasive technology Through the support of the Carnegie Foundation for the Advancement of Teaching an electronic version of this book is openly available under a Creative Commons license at The MIT Press Web site <http://mitpress.mit.edu> Contributors Richard Baraniuk Randy Bass Trent Batson Dan Bernstein John Seely Brown Barbara Cambridge Tom Carey Catherine Casserly Bernadine Chuck Fong Ira Fuchs Richard Gale Mia Garlick Gerard Hanley Diane Harley Mary Huber Pat Hutchings Toru Iiyoshi David Kahle M S Vijay Kumar Andy Lane Diana Laurillard Stuart Lee Steve Lerman Marilyn Lombardi Phil Long Clifford Lynch Christopher Mackie Anne Margulies Owen McGrath Flora McMartin Shigeru Miyagawa Diana Oblinger Neeru Paharia Cheryl Richardson Marshall Smith Candace Thille Edward Walker David Wiley **TID.** ,19?? **Register ...** California. Comprehensive Reference Ten Volume Set In Volume 1 this is reflected in the improved understanding of the properties of polymers in solution in bulk and in confined situations such as in thin films Volume 2 addresses new characterization techniques such as high resolution optical microscopy scanning probe microscopy and other procedures for surface and interface characterization Volume 3 presents the great progress achieved in precise synthetic polymerization techniques for vinyl monomers to control macromolecular architecture the development of metallocene and post metallocene catalysis for olefin polymerization new ionic polymerization procedures and atom transfer radical polymerization nitroxide mediated polymerization and reversible addition fragmentation chain transfer systems as the most often used controlled living radical polymerization methods Volume 4 is devoted to kinetics mechanisms and applications of ring opening polymerization of heterocyclic monomers and cycloolefins ROMP as well as to various less common polymerization techniques Polycondensation and non chain polymerizations including dendrimer synthesis and various click procedures are covered in Volume 5 Volume 6 focuses on several aspects of controlled macromolecular architectures and soft nano objects including hybrids and bioconjugates Many of the achievements would have not been possible without new characterization techniques like AFM that allowed direct imaging of single molecules and nano objects with a precision available only recently An entirely new aspect in polymer science is based on the combination of bottom up methods such as polymer synthesis and molecularly programmed self assembly with top down structuring such as lithography and surface templating as presented in Volume 7 It encompasses polymer and nanoparticle assembly in bulk and under confined conditions or influenced by an external field including thin films inorganic organic hybrids or nanofibers Volume 8 expands these concepts focusing on applications in advanced technologies e g in electronic industry and centers on combination with top down approach and functional properties like conductivity Another type of functionality that is of rapidly increasing importance in polymer science is introduced in volume 9 It deals with various aspects of polymers in biology and medicine including the response of living cells and tissue to the contact with biofunctional particles and surfaces The last volume is devoted to the scope and potential provided by environmentally benign and green polymers as well as energy related polymers They discuss new technologies needed for a sustainable economy in our world of limited resources Provides broad and in depth coverage of all aspects of polymer science from synthesis polymerization properties and characterization methods and techniques to nanostructures sustainability and energy and biomedical uses of polymers Provides a definitive source for those entering or researching in this area by integrating the multidisciplinary aspects of the science into one unique up to date reference work Electronic version has complete cross referencing and multi media components Volume editors are world experts in their field including a Nobel Prize winner
